SOUTHWESTERN BELL - Clarification of Use of Related Purchase Order Number (RPON) Field

Date: November 3, 1999

Number: CLECSS99-147

Contact: Southwestern Bell Account Manager

This Accessible Letter provides a clarification on the use of the RPON (Related Purchase Order Number) Field contained on the LSR. RPON is an optional field that can serve administrative and/or operational needs.

Per our discussion in the TPUC Open Meeting on October 21, 1999, CLECs have requested to relate two LSRs – one for conversion of an UNE-Loop with Number Portability and one for a new UNE-Loop. If the CLEC desires a Desired Frame Due Time (DFDT) on the new UNE-loop, the Coordinated Hot Cut (CHC) field and the DFDT field must be populated. If the CLEC also desires the new UNE-Loop LSR to be related with the conversion LSR, the RPON field on both LSRs must also be populated. This resolution is available immediately and will also provide a permanent solution.

If CLECs request additional requirements for the RPON field, these will be handled via the Change Management Process.

The CLEC Handbook has been updated in Resale, sub-section "Related Orders" under 3.3.2 – General Ordering via the LSOR and in UNE, sub-section "Related Orders" under 9.0 – General Ordering via the LSOR to reflect the changes agreed to by the CLECs, Telcordia and SWBT as follows:

"The Related Order Number (RPON) field on the LSR identifies the Purchase Order Number (PON) of a related service request as determined by the CLEC. The RPON field may be used on manual or non-MOG (Mechanical Order Generator) eligible LSRs for relating multiple requests for the same location and due date. For these type service requests, it is the CLEC's responsibility to:

- Coordinate and cross-reference related requests
- Issue the related LSR when applicable
- Populate the RPON field with the associated PON when applicable
- Issue LSRs in immediate succession; failure to do so can result in the LSRs being rejected

If the RPON field is populated on manual or non-MOG eligible LSRs, and the related LSR is not issued, the LSC will reject the LSR containing the RPON.

IMPORTANT: The RPON field is not recognized on MOG eligible LSRs that are mechanically submitted.

If the CLEC wishes to issue a supplement LSR on which firm order confirmations (FOCs) have been returned, a separate supplement must be submitted for each LSR when the requested change is applicable to all requests.

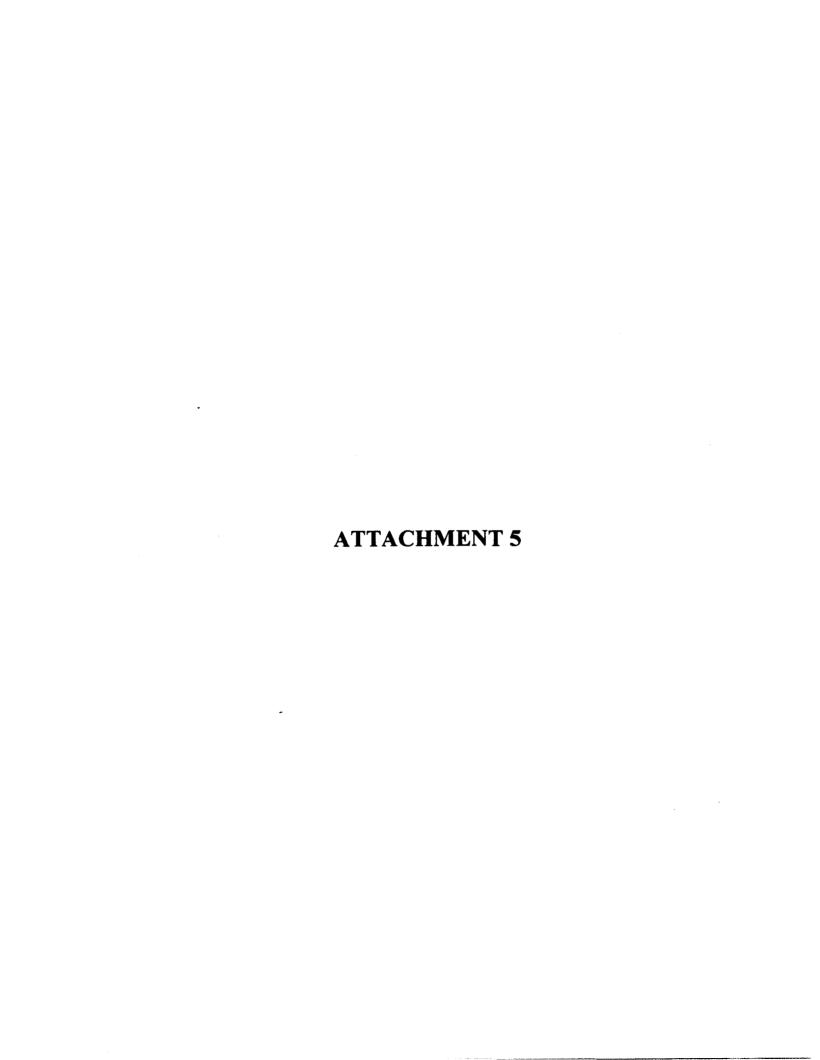

NOTE: Verbal supplements will not be accepted.

For additional information regarding RPONs, refer to the on-line LSOR, Section 6, LSR, Field Number 44."

The LSOR will also be updated for the RPON field in the next revision with a reference note as follows:

"Please refer to the CLEC Handbook for specific exceptions."

Questions should be directed to your Account Manager.

From: BANNECKER, BOB G (SWBT) [mailto:rb5422@txmaii.sbc.com]

Sent: Monday, April 24, 2000 3:36 PM

To: Chambers, Julie S, NLSSS

Subject: RE: production lines for testing

Julie.

SWBT has reviewed your request and after consideration has determined that our Wholesale organization cannot support our involvement in setting up, installing and administrating residential test lines into AT&T's office complex for AT&T to do production testing. Any account set ups that SWBT Wholesale would be involved in would have to be in our test environment. Should AT&T feel the need to install lines for production testing they will need to handle that directly with the SWBT Retail organization. Please call should you have any questions.

Thanks, Robert Bannecker

 1
           MONDAY, APRIL 17, 2000
                                                                         MR. NOLAND: Brian Noland.
               (9:12 a.m.)
                                                              3 Southwestern Bell.
 3
            MS. NELSON: Okay. Let's go on
                                                                         MS. CULLEN: Angie Cullen,
 5 the record in Project No. 20400, Section 271
                                                              5 Southwestern Bell.
 6 Compliance Monitoring of Southwestern Bell
                                                                         MS. LAWSON: Beth Lawson
 7 Telephone Company of Texas. Today we're going
                                                              7 Southwestern Bell.
 8 to be covering OSS issues as well as recent
                                                                         MS. NELSON: Okay. Anyone else
 9 performance under Tier 2 measurements. And at
                                                              9 from Southwestern Bell?
10 3 o'clock, we're going to move to coordinated
                                                                         MS. EGGEN: Mary Ann Eggen,
11 hot cuts frame due time issues for probably
                                                             11 Southwestern Bell.
12 about an hour or an hour and a half. Whether or
                                                                         MS. SALAS: Angie Salas,
13 not we end at that point in the day for OSS
                                                             13 Southwestern Bell.
14 depends on how far we get through the issues.
                                                             14
                                                                         MR. CHAPMAN: Carol Chapman,
         Initially, our thought is that we're
                                                             15 Southwestern Bell.
16 going to address the issue of integration before
                                                                         MS. DILLARD: Maria Dillard,
17 we take up the proposed new measures. And I'm
                                                             17 Southwestern Bell.
18 wondering if that's the most efficient way to do
                                                                         MS. COX: Lori Cox, Southwestern
                                                             18
19 it. If any of the parties here disagree with
                                                             19 Bell.
20 that way of doing it, if you could let us know
                                                                         MR. McFARLAND: J. D. McFarland,
                                                             20
21 right now, that would be helpful.
                                                             21 Southwestern Bell.
         Okay. Hearing no objections, that's
22
                                                             22
                                                                         MR. MAPES: Andy Mapes with
23 how we'll proceed.
                                                             23 Southwestern Bell.
        I would like to start by having
24
                                                             24
                                                                         MR. BERRINGER: John Berringer,
25 Southwestern Bell outline on the record the
                                                             25 Southwestern Bell.

                                                              1 example, on service address, it would be 14973
 2 up can be, in effect, populated on a local
                                                              2 Straub Hill Lane. So 14973 would be the street
 3 service request that you would want to transmit
                                                              3 number. Straub Hill Lane would be the street
 4 over the EDI ordering interface.
                                                              4 name -- or Lane would be the thoroughfare --
        It also allows you to take the
                                                              5 excuse me. So it would be in one string of
 6 information that you obtain in the pre-ordering
                                                              6 data.
 7 interfaces, and then you can move that data over
                                                                      When you look at the local service
 8 into your back-end systems. So, in other words,
                                                              8 request, which is OBF-approved, and OBF
 9 if a CLEC had a customer care database that they
                                                              9 determined how the fields would be populated on
10 wanted to also populate those pieces of
                                                             10 the local service request, those are individual
11 information that they're pulling from the
                                                             11 fields. So you have a separate field for street
12 pre-ordering information, they could do that
                                                             12 number, you have a separate field for street
13 with app-to-app interfaces, which these all are.
                                                             13 name, and a separate field for thoroughfare as
        Would you like, Ms. Nelson, for me to
                                                             14 well as some others.
14
15 go ahead and talk about some of the ways
                                                                     For instance, like directional, if you
                                                             15
16 Southwestern Bell supports the CLECs and moving
                                                             16 have a suffix to your street number or street
                                                             17 name, those types of things are separate fields.
17 forward on integration?
18
           MS. NELSON: Yes, that's what I
                                                             18
                                                                     So to be able to do it from a customer
                                                             19 service record, you have to take that string of
19 would like for you to outline, please.
           MS. LAWSON: One of the things
                                                             20 data and then populate it in the individual
20
21 that we have sent out April 4th was an
                                                             21 fields. Southwestern Bell provides
22 accessible letter, and there is an integration
                                                             22 documentation to show the delimiters and how you
23 workshop that is being held June 21st to work
                                                             23 can pull the street number from that string of
24 with the technical folks to see if the CLECs
                                                            24 data.
25 have questions, and our technical SMEs will be
                                                            25
                                                                        MR. SRINIVASA: When you say
                                                   Page 10
```

1 available to see what types of issues or 2 questions or concerns the CLECs have. In addition to that, Southwestern Bell 4 has contracted with GEIS as an outside 5 consultant to work with the CLECs at their 6 request, to determine what type of interfaces 7 would be best for their business needs, to work 8 with them; if they're having problems with 9 integration, to assist them with that. And 10 these were identified also in a supplemental 11 affidavit that Elizabeth Hamm filed on April the 12 5th. And I believe in the open meeting -- I 13 14 can't get my weeks straight -- I think it was 15 last week, John Mason gave an update with the 16 Texas PUC about the review that Telcordia is 17 doing of the documentation and the interfaces, 18 and a report will be published from Telcordia. MS. NELSON: Okay. Could you 20 explain how parsing -- the relationship of 21 parsing to integration. 22 MS. LAWSON: Okay. When you look 23 at a customer service record, the way 24 Southwestern Bell maintains that data in their 25 back-end systems is a single stream. So, for

Page 12 1 "string of data," these different fields, are 2 they separated by comma? 3 MS. LAWSON: They're delimiters. 4 MR. SRINIVASA: Delimiters. MS. LAWSON: It's either a space 5 6 or a virgule or something like that and a 7 certain number of fields that they would be. The other example of parsing that we 9 talked about is when we get an address 10 validation. And on a new connect -- we don't 11 have a customer service record, of course, so on 12 a new connect, you look at address validation. 13 And for EDI/CORBA, those are already parsed. So 14 when you pull that information back, that is 15 already in a parsed format that you can then 16 populate on the LSR that's in a parsed format, 17 based on how OBF designed the LSR. Did I do that slow enough, Ms. Nelson? 18 19 MS. NELSON: Yes. Thank you. Go ahead, Nara. 20 MR. SRINTVASA: Let me ask you, if 21 22 the information that's obtained from the 23 customer service record, although it is string, 24 you stated that they are delimited. So in order 25 to separate them out into different fields,

Page 15

Page 16

```
Page 13
 1 somewhere at the CLEC end, there has got to be a
                                                             1 they're developing clearinghouses where they'll
 2 program to recognize the delimiter and identify
                                                             2 go in and do it from across all ILECs because
 3 that it's a separate field so that it can be
                                                             3 when you look at EDI and CORBA pre-ordering and
 4 populated in the LSR. Is that correct?
                                                             4 EDI ordering, that's an interface that's an
           MS. LAWSON: That is correct. And
                                                             5 industry standard across all the ILECs in the
 6 that's the reason Southwestern Bell provides a
                                                             6 United States.
 7 documentation that provides for that. And also
                                                                        MR. SRINTVASA: EDI/CORBA, is that
 8 when you look at an app-to-app, that means that
                                                             8 an application-to-application type of interface
 9 there is going to be programming on the CLEC
                                                             9 or is it a graphical user interface?
10 side.
                                                                        MS. LAWSON: It's app-to-app, yes.
        So a CLEC has to have a programmer or
                                                            11
                                                                        MR. SRINTVASA: Okay. Prior to
11
                                                            12 CORBA, you had implemented DataGate.
12 either they have to hire a vendor to do the
13 programming for them. That's the difference on
                                                            13
                                                                       MS. LAWSON: Yes.
14 an application-to-application versus a GUI, a
                                                                        MR. SRINIVASA: Was that a
15 graphical user interface. It allows the
                                                            15 graphical user interface?
                                                                       MS. LAWSON: No. That's
16 flexibility for the CLECs to populate the LSR as
17 well as populate their databases and their
                                                            17 application-to-application. And Southwestern
18 customer care back-end systems as they desire.
                                                            18 Bell implemented that in advance of the industry
           MR. SRINTVASA: Okay. What
                                                            19 standards. So we did not wait till all the
19
20 happens in the GUI type of -- graphic user
                                                            20 pre-ordering transactions had been completed at
21 interface? You said after that, they will have
                                                            21 TCIF because we knew the CLECs wanted to start
22 to have a program to separate this out and
                                                            22 getting into business, and they wanted to
23 populate if it's a graphic user or GUI type of
                                                            23 program and have the flexibility of an app-to-
24 interface.
                                                            24 app. And that's the reason Southwestern Bell in
                                                            25 advance implemented DataGate. And then once EDI
25
           MS. LAWSON: On a graphical user
                                                   Page 14
```

1 interface, the examples that we have are 1 and CORBA became approved by the industry, then 2 Southwestern Bell implemented that as well. 2 VERIGATE and LEX. VERIGATE is the interface 3 that provides for the pre-ordering, and LEX is MS. NELSON: Could you explain 4 what -- Southwestern Bell has recently sent out 4 the ordering interface. And basically, there 5 you do a copy and paste functionality to move 5 an accessible letter, my understanding is, 6 regarding what's required for a CLEC to populate 6 the data over. 7 on a conversion order and a change that's being MR. SRINIVASA: So they have to 8 highlight -- say, for example, the CSR 8 proposed by Southwestern Bell. Could you 9 discuss that. 9 information is still in a string format. Right? MS. LAWSON: Right. MS. LAWSON: That's correct. I 10 10 MR. SRINIVASA: With the 11 was trying to get the exact date of the 11 12 accessible letter. 12 delimiters separating out the street number and The accessible letter was sent out 13 the street name and the thoroughfare and 14 March 29th. What this accessible letter is 14 whatever other designations you have, they have 15 to copy, highlight each portion separately and 15 talking about is making a change that on a 16 then paste them, copy them and paste them? 16 conversion for a basic loop/port, or loop with MS. LAWSON: And move them over, 17 port, that no longer would the service address 17 18 be required on the LSR. And if the service 18 right, to the LSR fields. MR. SRINIVASA: Okay. That's only 19 address is populated, it will be ignored for the 20 on the graphical user interface? 20 population of creating a service order. So it basically allows for these types 21 MS. LAWSON: And that's the reason 21 22 our large users are going to be utilizing 22 of conversion activity and as-is for the service 23 probably EDI interface, and they'll either 23 address because it will be -- whatever currently 24 program it themselves or there's vendors now in 24 exists today for that end user will be the 25 the industry that are doing that for CLECs, and 25 address that is populated.

```
Page 17
                                                                                                               Page 19
           MS. NELSON: Right. And is that
                                                             1 a requirement of the CLEC or the responsibility
 2 going through the change management process?
                                                             2 of the CLEC. However, you're utilizing
           MS. LAWSON: Yes, ma'am, it is,
                                                             3 information that's provided from Southwestern
 3
 4 and we had the walk-through on that April 5th,
 5 either 4th or 5th, whatever the Friday was, and
                                                                     So it requires, you know, documentation
 6 we did have approval from all CLECs to implement
                                                             6 and technical support and, you know, an under-
 7 that. So that will be going in the May release.
                                                             7 standing of how they're going to provide you the
           MS. NELSON: Okay.
                                                             8 data which then you're going to resubmit back to
 8
           MR. SRINIVASA: Let me ask the
 9
                                                             9 Southwestern Bell. So although it is
10 CLECs, the explanation provided to us by
                                                             10 programming required by the CLEC, it's
11 Southwestern Bell, is that your understanding?
                                                            11 definitely, you know, dependent upon how
12 If you have a different perspective of that,
                                                            12 Southwestern Bell's back-end systems and their
13 would you explain that to us, please.
                                                            13 databases are structured.
         Please identify yourself before you
14
                                                                     You know, our intention was to
                                                            15 integrate pre-order and order. And I think, you
15 speak.
           MS. CHAMBERS: This is Julie
                                                            16 know, some of the staff and the Commission has
16
17 Chambers with AT&T.
                                                            17 seen, you know, AT&T's system, and we thought we
         I think as Beth laid it out, that does
                                                            18 were working toward that. It's only through
18
19 describe the issues and the association with
                                                            19 really when you get into, you know, doing
20 integration of pre-order and order. Would you
                                                            20 business and you realize the problems that we've
21 like to hear some of AT&T's insight into this
                                                            21 had associated with the integration, that we've
22 issue as well?
                                                            22 learned that we were not successful at doing it.
23
                                                            23 And we've yet to really hear of any CLEC that
           MR. SRINTVASA: Yes, your
24 experience.
                                                            24 using DataGate from an address validation
25
                                                            25 perspective has successfully integrated DataGate
           MS. CHAMBERS: Experience.
                                                   Page 18
                                                                                                               Page 20
           MS. NELSON: And I think we're
                                                             1 and EDI.
 2 interested in your integration. And to make
                                                                     And the examples that Beth mentioned
 3 this helpful, it would be helpful to the
                                                             3 were utilizing the CSR which, you know, all
 4 Commission staff if we knew what your company
                                                             4 along AT&T had been told to utilize address
 5 had done from an integration standpoint so we
                                                             5 validation and not the CSR. And so that's
 6 know what you're talking about and if you're
                                                             6 really the basis of the way that we've
 7 going to discuss problems that you've had, that
                                                             7 structured our, you know, pre-order system.
 8 you've raised in the past.
                                                                     So to use address validation, still
                                                             9 with DataGate, it is not provided back in a
           MS. CHAMBERS: Okay. Basically,
10 AT&T began working with Southwestern Bell on
                                                            10 parsed format. Beth mentioned that it is with
11 these issues, you know, several years ago. And
                                                               EDI/CORBA, but with DataGate it is not, so it
12 since probably November of '98, we've been
                                                            12 does require you to take a concatenated field
13 talking to Southwestern Bell about the issues
                                                            13 from pre-order and attempt to split that out and
14 associated with parsing of the address.
                                                            14 put that on the proper fields on an LSR.
15
         And at that point in time, you have to
                                                                        MR. SRINIVASA: You say prior to
16 recognize that that was prior to EDI/CORBA being
                                                            16 obtaining this information from -- now you've
17 available. So AT&T chose to utilize DataGate
                                                            17 learned that it's from CSR -- that you were told
18 for pre-order, and that has been the basis of
                                                            18 that you need to obtain that from address
                                                            19 validation?
19 our development.
20
         You know, in doing so, I mean, as far
                                                            20
                                                                        MS. CHAMBERS: Yes. It's actually
21 as AT&T'S implementation of some type of
                                                            21 just recently that we've learned to utilize the
22 integration, Beth is correct in that it does
                                                            22 CSR. The method that DataGate -- the
23 require programming on the CLEC side to actually
                                                            23 documentations really suggest that you should
24 do the integration. It's not something that
                                                            24 use address validation for the purpose of
25 Southwestern Bell does. It's really, you know,
                                                            25 populating the address. And --
```

M	ONDAY, APRIL 17, 2000		PROJECT NO. 20400	
	Page 21		Page 23	1
1	MR. SRINIVASA: The data which is	1	concatenated field means like it's a group of	1
2	there in address validation told me these are		data fields.	
3	concatenated fields these are not in the	3	MR. SRINIVASA: There are no	
4	string format with the delimiters, separated by	4	delimiters in those?	
5	space or whatever the delimiters are?	5	MS. LAWSON: Yes, just like there	1
6	MS. CHAMBERS: Right. It's not	6	is with the address validation. The point I was	l
7	set delimiters as it must be on the CSR. And	7	trying to make is, even if a CLEC to our	
8	also it's just through really learning that		knowledge, there may have been some CLECs that	
9	we've found that something like avenue, an	ŀ	have been done this that just haven't brought it	1
10	avenue could be a city I mean, a street name.		to our knowledge with DataGate, to take the	1
11	Excuse me when in the documentation it really	11	pieces of information from address validation.	1
12	supports that that should be a thoroughfare.	12	The point I was trying to make is what	ŀ
13	So you program your systems to, you	13	two CLECs have done that have notified the FCC	
14	know, put "Avenue" in the thoroughfare field	14	have done it with the customer service record	
15	versus "Avenue" as a street name. So there's	15	which is the same type of programming logic that	
16	just inherent, you know, problems with trying to	1	you would use in doing the address validation	
1	figure that out on a one-by-one basis.		piece.	
18	With	18	And portions of the DataGate address	1
19	MS. NELSON: Before you move on	19	validation are parsed. The city, state, and zip	ļ
20	MS. CHAMBERS: Yes.		are already parsed. So some of the DataGate	١
21	MS. NELSON: I wondered if	1	information for address validation is partially	1
22	Southwestern Bell wanted to respond to when you	1.	parsed. And, of course, with the EDI/CORBA, as	
23	said you have yet to hear of a CLEC who has		Ms. Chambers mentioned, it is fully parsed. And	İ
24	successfully integrated order and pre-order.	24	my understanding is, AT&T is starting to test	l
25	And I think we want to hear from other CLECs	25	and has tested successfully with CORBA using the	
	Page 22		Page 24	1
1	today, but I'm not so sure all CLECs are here,	1	address validation.	
2	so I just don't want to leave that sort of	2	MR. WILLARD: I would like to be	١
3	hanging out there if Southwestern Bell wants to	3	on the record.	l
4	respond to that.	4	MS. NELSON: Would you identify	
5	MS. LAWSON: Yes, sir, thank you,	5	yourself.	l
6	Ms. Nelson. This is Beth Lawson with	6	MR. WILLARD: Walt Willard with	l
7	Southwestern Bell.	7	AT&T. I would like to go on the record.	١
8	I did want to mention that we have two	8	We have never integrated the pre-order	
9	CLECs that filed ex partes with the FCC, Sage	9	with the order. Indeed, we have tested CORBA as	l
	and Navigator. Both have taken the concatenated	10	a single transaction, which is address	ŀ
	fields from DataGate and been able to take those	11	validation. AVQ is transaction type.	
12	parsed fields and put them on an LSR.	12	MS. NELSON: Have you integrated	
13	So whether it's a customer service	13	DataGate with EDI in terms of order and	
14	record or the address validation transaction,	14	pre-order?	
15	both of those from DataGate are the same type of	15	MS. CHAMBERS: That's what I was	
16	logic in that they are a concatenated field that	16	trying to address initially Julie Chambers	l
17	they have to take and then parse it onto a local	17	with AT&T.	
18	service request.	18	Our intentions, you know, were and are	
19			to integrate DataGate with EDI. We have yet to	l
20	sorry. Nara, did you have a question? I didn't	20	do so. We have asked for, you know,	
21			documentation such as when they implemented EDI/	
22			CORBA with the address vali, you know, parsing	
	,		of the address in EDI/CORBA, and we've asked for	
			that parsing logic, you know, any clues to	1
25	MS. LAWSON: It's the same. A	25	assist in our ability to do that integration.	

	ROJECT NO. 20100			MUNDAY, APKIL 17,	, 2000
ı	I	Page 25		P	age 27
	And, you know, here we are. We're		1	are you intending to do without having some sort	J
:	still faced with trial and error. As recently			of integration already built in? You're not	
1:	3 as February, we met with the account team, you			going to type individual orders separately, are	
	know, our AT&T account team. And, you know,			you?	
1	they recognized that we had been asking for this		5	MR. BURLEY: That's what we're	
	information.		6	doing.	
-	You know, I understand that there's a		7	MR. SRINIVASA: But if you're	
1 8	workshop in a couple of months. I know that,		8	planning to do mass entry, that skill	
	you know, we have requested to have the		9	MR. BURLEY: You certainly don't	
	consulting with GEIS and have not heard		10	want to the manual entry world. You're	
111			1	exactly correct.	
112			12	THE REPORTER: Would you please	
	we didn't ask the right question, but we have			identify yourself for the record.	
	definitely been interested and been pursuing		14	MR. BURLEY: I'm sorry. Dave	
1	this since the beginning of our development.		l '	Burley from MCI WorldCom.	
16			16	There are some things that you can	
1	placing your orders today if you haven't		· ·	integrate right now. There are some fields that	
	integrated typing everything?		ı	are absolutely perfect. ATN, account telephone	1
19	• • • •			number, is an exact match between pre-ordering/	
1	is why you see rejects, is because we are		I	ordering. We're able to integrate that and	
	relying on a system to try to do that. It does			property complete an order for that field.	J
	require then additional manual work to correct		22	The service address field and there's a	1
	those problems or, you know, rejects that are		l	few other fields that are still in a	
	then returned.		l	concatenated format. It's our intention to have	ļ
25				a fully automated integrated system whereby the	[

	dropping. What do you attribute it to percent-			information that you receive in your pre-order	- 1
1	wise?			transaction does a couple of things.	l
3			3	One is in the format necessary to	
4	-9			compile a firm local service request. Two has	j
5				the valid values that will pass the edits within	
6	industry, for all the CLEC orders.			SWBT's or the processing system.	i
7	MS. CHAMBERS: I think that		7	You don't just want to get across 2943	l
	there's a couple of things that I attribute that			Ridgeway Avenue. You want to ensure that we	[
	to. There was a change back in September for			both are correctly abbreviating the thoroughfare	
	how the rejects were calculated. And then also			in the way that you want it and the way the	
	in January, Southwestern Bell implemented the	ľ		order processing edits are set up.	1
	post-FOC jeopardy. So now any rejects would		12	So we want to ensure that we're getting	
	actually be returned as jeopardies rather than			across fully and completely to initiate the LSR	- 1
	rejects.	}		but also the fact that we're both abbreviating	ļ
15	So we've seen actually I guess from	,		it correctly or have the same standard	-
	December up until now, jeopardies have increased		16	abbreviations.	1
,	from, say, 82 in December to 916 in March. So		17	There are some fields that you are able	[
	as rejects might be dropping because they're now			to bring across in the SWBT pre-order	[
	just captured in a different category, which is			transaction and integrate into our EDI ordering.	ı
ŀ	jeopardies, is perhaps one very valid reason			It's not a great number. A great deal of it	
21	MR. SRINTVASA: So			you are precisely correct and part is manual	- 1
22	MS. CHAMBERS: that they have			intervention. That's not the way you want to	
l	declined.		23	run the show.	1
24	MR. SRINTVASA: Let me ask MCI, if		24	But in that string field, the	1
	you are trying to mass market your products, how		25	concatenated address field, I can certainly see	1

1 the delimiter relative to like the community 2 name, and I move to there, but I haven't seen 3 any of the rules regarding how to put or 4 interpret the thoroughfare value within there. 5 MR. SRINIVASA: So the 6 documentation that you have reviewed is not 7 clear to you. 8 MR. BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions				_	
2 Southwestern Bell, is working with a vendor that 3 any of the rules regarding how to put or 4 interpret the thoroughfare value within there. 5 MR. SRINIVASA: So the 6 documentation that you have reviewed is not 7 clear to you. 8 MR. BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interims step, and McI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address — and the way I 23 understand it, SwBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes — I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Parry A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MR. SRINASAN Plaese go ahead. 22 MR. SLAWSON Okay. I would like 23 MR. SLAWSON Okay. I would like 24 to respond to whenever it's appropriate. 25 Southw			Page 29		Page 3
3 any of the rules regarding how to put or 4 interpret the thoroughfare value within there. 5 MR SRINTVASA: So the 6 documentation that you have reviewed is not 7 clear to you. 8 MR BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 18 MR. BURLEY: It's a significant 19 interrim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and 24 they're going to populate the address and 25 internal processes — I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. We convert you from Parry A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't be believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 17 The serve of things I would like 21 to respond to whenever it's appropriate. 23 MS. LAWSON: Okay. I would like 24 to respond to towhenever it's appropriate. 25 MR. SRINVASA: Please go alsead. 26 MS. LAWSON: Okay. I would like 27 to respond to towhenever it's appropriate. 28 MS. LAWSON: Okay. I would like 29 to receive the that the provise of the integration of the the conversion of		•		1	, ,
4 interpret the thoroughfare value within there. 5 MR SRINIVASA: So the 6 documentation that you have reviewed is not 7 clear to you. 8 MR BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR, BURLEY: I've a significant 19 interni step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and interni step, and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and internal processes — I still have questions 1 regarding supplemental transactions or 2 additional requests that we maybe initiate of following the conversion order. 4 We convert you from Party A to Party B, but tomorrow I want to issue another order to 6 change a feature or to do something that may need an address, I don't believe in that in sinstance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you respond to that. 10 MS. LAWSON It's the LSOR 11 regarding supplemental transactions or 2 additional requests that we maybe initiate of following the conversion order. 4 We convert you from Party A to Party B, but tomorrow I want to issue another order to 6 change a feature or to do something that may robe and a reject back and it became an address, I don't believe in that it would be a jeopardy and would be sent back with a jeopardy code. 19 deits and then LASR GUI edits that would be the 20 move other edits back? 21 sometimes would send a reject back and it became an agreement that after the FOC had been sent, 2 that it would be a jeopardy and would be sent back? 22 if we have the address of the conversion	- 1	•		1	-
5 MR. SRNIVASA: So the 6 documentation that you have reviewed is not 7 clear to you. 8 MR. BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. 1 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 18 MR. BURLEY: It's a significant 19 interim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and 23 internal processes — I still have questions 24 they're going to populate the address and 25 internal processes — I still have questions 26 regarding supplemental transactions or 27 additional requests that we maybe initiate 28 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 make about the jeopardies, I just wanted to make 12 zume was reviewed to make 13 single thing, but I've read quite a bit. 14 address and the parsing issue, address up front, and they would 15 not be considered a jeopardy. 16 So when you look at the parsing and the 17 address situation, that would the that would be the MOG 18 jeopardy type situation. That would be the MOG 18 jeopardy type situation. That would be the MOG 19 deits and then LASR GUI edits that would be the MOG 19 deits and then LASR GUI edits that would be the MOG 19 that twe're depending on if the FoC had been sent 21 that we're the were, depending on if the FoC had been sent 22 additional requests that we maybe initiate 23 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do someth	,	• • • • • • • • • • • • • • • • • • • •		3	is going to provide the integration of the
6 documentation that you have reviewed is not 7 clear to you. 8 MR. BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. 1 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interim step, and McI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and 23 internal processes — I still have questions MS. Lawson with regard to using 14 they region to populate the address or if 15 we do populate the address or if 16 we do populate the address and 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 internim step, and McI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and 23 internal processes — I still have questions Page 30	4	• •		4	pre-order and order, using our interfaces. I
7 clear to you. 8 MR. BURLEY: And I'm not saying 9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 Ms. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address and so of the parsing issue. 18 MR. BURLEY: It's a significant sinterpret in the parsing issue of the parsing issue. 19 Ms. BURLEY: It's a significant sinterpret in the parsing issue of the parsing issue. 19 Ms. BURLEY: It's a significant sinterpret in the parsing issue address upon the parsing issue address upon the parsing issue address upon the parsing issue. 19 Ms. BURLEY: It's a significant sinterpret in the parsing issue address upon the parsing issue address and the parsing issue, address upon to the parsing issue, address upon the pars	1 1			5	didn't hear that mentioned. And our account
8 Also, the comment that Ms. Chambers 9 I've reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 Ms. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interrim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address - and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. BURLEY: It's a significant 12 move other edits back? 23 MS. LAWSON: It's the LSOR 24 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MS. SRINIVASA: Please go ahead. 22 MS. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 to review as sent back? 25 ms. Lawson on that, then the talking about the jeopardy can address and the LARS GUI edits that would be the MoG 15 peopardies and we get back to an address and a parsing issue, address up front, and they would it parsing iss		•		6	manager is here, and she is working with MCI and
9 I've reviewed every bit of documentation. I 10 reviewed a few hundred pages, trying to ensure 11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 18 MR. BURLEY: It's a significant 19 interim step, and McI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and 23 internal processes - I still have questions 25 regarding supplemental transactions or 2 additional requests that we maybe imitate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit to rexclude the address. 9 MS. LAWSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: Ms. Lawson, could you 10 respond to that. 12 sure it was very clear that when you talk about 13 jeopardies and we get back to an address and 14 parsing issue, address up front, and they would 15 not be considered a jeopardy. 16 So when you look at the parsing and the 17 address situation, that would be the MOG 18 jeopardy type situation. That would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 19 edits and then LASR GUI edits that would be the MOG 20 move other edits back? 21 move other edits back? 22 sometimes would send a reject back and it became 23 an agreement that after the FOC had been sent 24 that any subsequent errors or problems	7	•		7	that vendor to move forward on that.
10 sure — I know you were asking the general 11 that I've been able to build it correctly or 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interrim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address - and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes — I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 to repect was sent back? 25 MS. LAWSON: Okay. I would like 26 to respond to whenever it's appropriate. 27 MS. LAWSON: Right, and so that 28 transport the rock of the was after FOC. So if here was 29 MS. LAWSON: Okay. I would like 20 to respond to whenever it's appropriate. 20 MS. LAWSON: Okay. I would like 21 to respond to whenever it's appropriate. 21 move other edits back to an address, and 12 papersing and the packets unit the parsing an	1	• •		8	Also, the comment that Ms. Chambers
11 that I've been able to build it correctly or 12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS NELSON. Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interim step, and MC has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address and the way 1 23 understand it, SwBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 that me conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MS. SANNIVASA: Please go ahead. 22 MS. LAWSON: Okay. I would like 23 unove other edits back? 24 move other edits back? 25 move other edits back? 26 me the MGG 27 mS. NELSON: Did Southwestern Bell 28 to rejects, address up front, and they would the the MGG 28 didress situation, that would be the MGG 29 edits and then LASR GU edits that would be the MGG 38 jeopardy type situation. That would be the MGG 38 jeopardy type situation. That would be the MGG 38 postation, that would be defended as postation, that wou	1	•		9	made about the jeopardies, I just wanted to make
12 interpret it correctly. I haven't read every 13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 18 MR. BURLEY: It's a significant 19 interim step, and MCI has certainly supported 10 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address — and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes — I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I and off' believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 18 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MS. SALAWSON: Okay. I would like 23 MS. LAWSON: Okay. I would like 24 was after FOC. So flow-through is only taken 25 understand it, SWBT is not going to pedit it, and 26 dits. For the migration, that would be the MOG 27 MS. NELSON: Did Southwestern Bell 28 move other edits back: on the AMSON: There were some that 29 were, depending on if the FOC had been sent 20 that are the FOC had been sent 21 because before this change took place, LSE 22 sometimes would send a reject back and it became 3 an agreement that after the FOC had been 4 they rive depending on if the FOC had been se	- 1			10	sure I know you were asking the general
13 single thing, but I've read quite a bit. 14 MS. NELSON: Will the change 15 discussed by Ms. Lawson with regard to using 16 telephone numbers only on conversions address 17 some of the parsing issue? 18 MR. BURLEY: It's a significant 19 interim step, and MCI has certainly supported 20 that. For the migration type conversion orders, 21 by us not having to populate the address or if 22 we do populate the address or if 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes — I still have questions Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 18 current requirements are per the LSOR 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. LAWSON: There were some that 24 were, depending on if the FOC had been sent, 25 that it would be a jeopardy at that point 26 because before this change took place, LSE 28 sometimes would send a reject back and it became 3 an agreement that after the FOC had been sent, 4 that any subsequent errors or problems at that 5 point would be considered a jeopardy and would 6 be sent back with a jeopardy code. 7 MS. NELSON: Does that affect your 8 flow-through rates? How is that captured in the 9 form of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC that 14 wouldn't impact flow-through. 15 MS. NELSON: Does that affect your 16 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC that 18 system, you found some		-			
21 by us not having to populate the address or if 22 we do populate the address and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions Page 30 MS. LAWSON: Mall be a jeopardy at that point would be a reject back and it became an argement that after the FOC had been sent, that it would be a jeopardy at that point went, became an argement that after the FOC had been sent, that it would be a jeopardy at that point went, became 3 an agreement that after the FOC had been sent, that it would be a jeopardy and would be a jeopardy and would be a jeopardy and would be be sent back 3 flow-through rates? How is that captured in the form of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're distributing SORD, so that would be at peopardy and would interpart flow-through stops at SORD when you're 3 distributing SORD, so that would be at peopardy and would interpart flow-through stops at SORD when you're 3 distributing SORD, so that would be at peopardy and would be at peopardy and would	1		ĺ	19	edits and then LASR GUI edits that would be the
22 we do populate the address and the way I 23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions Page 30	20	that. For the migration type conversion orders,		20	
23 understand it, SWBT is not going to edit it, and 24 they're going to populate the address and 25 internal processes I still have questions Page 30 P				21	MS. NELSON: Did Southwestern Bell
24 they're going to populate the address and 25 internal processes I still have questions Page 30 Page 30 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you 10 respond to that. MS. LAWSON: It's the LSOR 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 21 to respond to whenever it's appropriate. 22 mas after FOC. So if there was activity that took place after that though a ejeopardy at that point 1 would be a jeopardy at that point 25 that it would be a jeopardy at that point 25 that it would send a reject back and it became 2 sometimes would send a reject back and it became 2 sometimes would send a reject back and it became 2 sometimes would send a reject back and it became 2 sometimes would send a reject back and it became 2 sometimes would send a reject back and it became 3 an agreement that after the FOC had been sent, 25 that it would send a reject back and it became 3 an agreement that after the FOC had been sent, 25 sometimes would send a reject back and it became 3 an agreement that after the FOC had been sent, 25 sometimes would send a reject back with a jeopardy code. 5 point would be considered a jeopardy and would 6 be sent back with a jeopardy code. 7 ms. NELSON: Does that affect your 8 flow-through research 17 ms.		• •		22	move other edits back?
Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 25 that it would be a jeopardy at that point 26 because before this change took place, LSE 2 sometimes would send a reject back and it became 3 an agreement that after the FOC had been sent 4 that any subsequent errors or problems at that 5 point would be considered a jeopardy and would 6 be sent back with a jeopardy code. 7 MS. NELSON: Does that affect your 8 flow-through rates? How is that captured in the 9 form of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC time. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 that subsequently when it hit the back-end 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that					
Page 30 1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 MR. SRINIVASA: Please go ahead. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 Sometimes would send a reject back and it became 25 sometimes would send a reject back and it became 26 sometimes would send a reject back and it became 26 sometimes would send a reject back and it became 26 sometimes would send a reject back and it became 26 an agreement that after the FOC had been sent 26 that any subsequent errors or problems at that 26 point would be considered a jeopardy and would 27 been that any subsequent errors or problems at that 28 point would be considered a jeopardy and would 29 be sent back with a jeopardy code. 20 MS. LAWSON: Well, it's after FOC 21 flow-through stops at SORD when you're 22 distributing SORD, so that would be at FOC time. 23 So if something happened after FOC, that 24 wouldbrit impact flow-through. 25 MR. SRINIVASA: So the order went 26 through all the way; it was MOGable, assuming 27 that subsequently when it hit the back-end 28 system, you found some errors and that's when 29 MR. LAWSON: Right, and so that 21 was after FOC. So if there was 21 was after FOC. So if there was 22 into account through the FOC. So if there was					· · · · · · · · · · · · · · · · · · ·
1 regarding supplemental transactions or 2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINTVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 sometimes would send a reject back and it became 3 an agreement that after the FOC had been sent 4 that any subsequent errors or problems at that 5 point would be considered a jeopardy and would 6 be sent back with a jeopardy code. 7 MS. NELSON: Does that affect your 8 flow-through rates? How is that captured in the 9 form of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC time. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 MR. SRINTVASA: So the order went 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	25	internal processes I still have questions		25	that it would be a jeopardy at that point
2 additional requests that we maybe initiate 3 following the conversion order. 4 We convert you from Party A to Party B, 5 but tomorrow I want to issue another order to 6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. How is that captured in the 9 form of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC time. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 MR. SRINIVASA: So the order went 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	3		}	2	sometimes would send a reject back and it became
6 change a feature or to do something that may 7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 to respond to whenever it's appropriate. 25 MS. LAWSON: Okay. I would like 26 the sent back with a jeopardy code. 7 MS. NELSON: Does that affect your 8 flow-through rates? How is that captured in the 9 form of 18 flow-through stops at SORD when you're 10 distributing SORD, so that would be at FOC time. 11 So if something happened after FOC, that 12 wouldn't impact flow-through. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 MR. SRINIVASA: So the order went 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that					
7 need an address, I don't believe in that 8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 I to respond to whenever it would like 25 MS. LAWSON: Okay. I would like 26 I dow-through rates? How is that captured in the 27 MS. NELSON: Does that affect your 28 flow-through rates? How is that captured in the 28 flow-through stops at SORD when you're 29 distributing SORD, so that would be at FOC time. 20 I have through after FOC, that 21 wouldn't impact flow-through. 22 MR. SRINIVASA: So the order went 23 MS. LAWSON: Right, and so that 24 was after FOC. So flow-through is only taken 25 into account through the FOC. So if there was 26 activity that took place after that, then that	4	following the conversion order.		3	an agreement that after the FOC had been sent
8 instance I can submit or exclude the address. 9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 gform of 10 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC time. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 MR. SRINIVASA: So the order went 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	5	following the conversion order. We convert you from Party A to Party B,		3 4	an agreement that after the FOC had been sent that any subsequent errors or problems at that
9 MS. NELSON: Ms. Lawson, could you 10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 activity that took place after that, then that	- 1	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to		3 4 5	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would
10 respond to that. 11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Well, it's after FOC 11 flow-through stops at SORD when you're 12 distributing SORD, so that would be at FOC time. 13 So if something happened after FOC, that 14 wouldn't impact flow-through. 15 MR. SRINIVASA: So the order went 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 to respond to whenever it's appropriate. 21 was after FOC. So flow-through is only taken 22 MR. SRINIVASA: Please go ahead. 23 activity that took place after that, then that	6	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may		3 4 5 6	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code.
11 MS. LAWSON: It's the LSOR 12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 to respond to kernel activity of the properties of the port. 25 If low-through stops at SORD when you're 26 distributing SORD, so that would be at FOC time. 27 that subsequent order after the properties of through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back? 20 MS. LAWSON: Right, and so that to respond to whenever it's appropriate. 21 was after FOC. So flow-through is only taken into account through the FOC. So if there was activity that took place after that, then that	6 7	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address.		3 4 5 6 7 8	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the
12 requirements for a change activity. The change 13 that we're talking about making is for 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 distributing SORD, so that would be at FOC time. 15 distributing SORD, so that would be at FOC time. 16 through all the way; it was MOGable, assuming 17 that subsequently when it hit the back-end 18 system, you found some errors and that's when 19 the reject was sent back? 20 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	6 7 8	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address.		3 4 5 6 7 8	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the
13 So if something happened after FOC, that 14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 21 to oversion activity when you go from retail or 24 wouldn't impact flow-through. 25 MR. SRINIVASA: So the order went 26 through all the way; it was MOGable, assuming 27 that subsequently when it hit the back-end 28 system, you found some errors and that's when 29 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	6 7 8 9	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you		3 4 5 6 7 8 9	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC
14 conversion activity when you go from retail or 15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 24 wouldn't impact flow-through. 25 MR. SRINIVASA: So the order went 26 through all the way; it was MOGable, assuming 27 that subsequently when it hit the back-end 28 system, you found some errors and that's when 29 MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	6 7 8 9 10	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that.		3 4 5 6 7 8 9 10	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're
15 resale to the basic loop or port or loop with 16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 22 MR. SRINTVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 25 MR. SRINTVASA: Please go ahead. 26 MR. SRINTVASA: Please go ahead. 27 MR. SRINTVASA: Please go ahead. 28 MR. SRINTVASA: Please go ahead. 29 activity that took place after that, then that	6 7 8 9 10	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR		3 4 5 6 7 8 9 10 11 12	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time.
16 port. 17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MR. SRINIVASA: Please go ahead. 22 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change		3 4 5 6 7 8 9 10 11 12 13	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that
17 So in subsequent order activity other 18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MR. SRINIVASA: Please go ahead. 22 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or		3 4 5 6 7 8 9 10 11 12 13	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through.
18 than the conversion, it will be whatever the 19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MR. SRINIVASA: Please go ahead. 22 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or		3 4 5 6 7 8 9 10 11 12 13 14 15	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went
19 current requirements are per the LSOR. 20 There's a couple of things I would like 21 to respond to whenever it's appropriate. 21 MR. SRINTVASA: Please go ahead. 22 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14 15	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port.		3 4 5 6 7 8 9 10 11 12 13 14 15	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went
There's a couple of things I would like There's a couple of things I would like MS. LAWSON: Right, and so that I was after FOC. So flow-through is only taken MS. LAWSON: Okay. I would like MS. LAWSON: Right, and so that 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was MS. LAWSON: Right, and so that 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14 15 16	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port.		3 4 5 6 7 8 9 10 11 12 13 14 15 16	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming
21 to respond to whenever it's appropriate. 22 MR. SRINIVASA: Please go ahead. 23 MS. LAWSON: Okay. I would like 21 was after FOC. So flow-through is only taken 22 into account through the FOC. So if there was 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14 15 16 17	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end
MR. SRINTVASA: Please go ahead. 22 into account through the FOC. So if there was 23 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14 15 16 17 18	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when
23 MS. LAWSON: Okay. I would like 23 activity that took place after that, then that	6 7 8 9 10 11 12 13 14 15 16 17 18 19	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the current requirements are per the LSOR.		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back?
	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the current requirements are per the LSOR. There's a couple of things I would like		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back? MS. LAWSON: Right, and so that
24 to mention this is Beth Lawson with 24 would not impact flow-through from the	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the current requirements are per the LSOR. There's a couple of things I would like to respond to whenever it's appropriate.		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back? MS. LAWSON: Right, and so that was after FOC. So flow-through is only taken
, · · · · · · · · · · · · · · · · · · ·	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the current requirements are per the LSOR. There's a couple of things I would like to respond to whenever it's appropriate. MR. SRINIVASA: Please go ahead.		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINTVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back? MS. LAWSON: Right, and so that was after FOC. So flow-through is only taken into account through the FOC. So if there was
25 Southwestern Bell that my understanding is, 25 definition that's been defined.	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	following the conversion order. We convert you from Party A to Party B, but tomorrow I want to issue another order to change a feature or to do something that may need an address, I don't believe in that instance I can submit or exclude the address. MS. NELSON: Ms. Lawson, could you respond to that. MS. LAWSON: It's the LSOR requirements for a change activity. The change that we're talking about making is for conversion activity when you go from retail or resale to the basic loop or port or loop with port. So in subsequent order activity other than the conversion, it will be whatever the current requirements are per the LSOR. There's a couple of things I would like to respond to whenever it's appropriate. MR. SRINIVASA: Please go ahead. MS. LAWSON: Okay. I would like		3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	an agreement that after the FOC had been sent that any subsequent errors or problems at that point would be considered a jeopardy and would be sent back with a jeopardy code. MS. NELSON: Does that affect your flow-through rates? How is that captured in the form of MS. LAWSON: Well, it's after FOC flow-through stops at SORD when you're distributing SORD, so that would be at FOC time. So if something happened after FOC, that wouldn't impact flow-through. MR. SRINIVASA: So the order went through all the way; it was MOGable, assuming that subsequently when it hit the back-end system, you found some errors and that's when the reject was sent back? MS. LAWSON: Right, and so that was after FOC. So flow-through is only taken into account through the FOC. So if there was activity that took place after that, then that

1 MS. NELSON: And what type of	1	error or a Southwestern Bell-caused error? And
2 address issues?	2	I don't know if we can get into that kind of
3 MS. HALL: Actually, it could be	3	detail without going through case-by-case.
4 field visit determined address invalid.	4	MS. HALL: I don't think it would
5 MS. NELSON: Okay. Address	5	be either.
6 invalid, is that a parsing problem?	6	MS. KETTLER: My comments this
7 MS. HALL: It could be, was my	7	is Patti Kettler with Birch Telecom.
8 understanding.	8	We've experienced a great deal of
9 MR. SRINIVASA: So, for example,	9	problems in this area. Part of the issue is
10 if	10	a significant part of the issue is not related
11 MS. NELSON: Wait. Let me just		to parsing, per se, but to an inconsistency in
12 have her finish going through the list of what		Southwestern Bell's databases. Many of the
13 address issues are related and coming back as	1	provisioning systems work off of a LFACS-based
14 jeopardies.	1	addressing source, and that's where the
15 (Pause in proceedings)	15	inconsistency lies.
16 MS. NELSON: Let me go ahead. I'm	16	So when they go to dispatch someone,
17 just waiting for a response from AT&T.	17	there is an inconsistency between what's on the
Well, while you're looking for that, I	18	SORD order and what's in the LFACS system. And,
19 really want to know what type of address issues	19	consequently, they will jeopardy it back then
20 are coming back as jeopardies and what types	20	saying it's an invalid address.
21 would be caught in up-front edits and would com	c 21	And bringing that back to the primary
22 back as rejects.	22	point of a reduction in rejects, it does go to
Ind	122	the inner of many of these mobilems have many
23 MS. MURRAY: I think we do have	43	the issue of many of those problems have now
23 MS. MURRAY: I think we do have 24 some. I don't think it was directly to that	24	moved to the back-end; in other words, they're not jeopardies anymore, and that is or not

Page 37 Page 39 1 rejects anymore, and that is a significant 1 subsequent order activity that Southwestern Bell 2 explanation for the reduction in rejects as 2 initiates to also sync up the CRIS service 3 opposed to any front-end edits or parsing type 3 address on those. 4 of activities. And the change was no longer requiring MR. SRINIVASA: Now, let me ask 5 the service address on the conversion activity. 6 this: Inconsistency -- the customer service 6 If there is any inconsistency between PREMIS and 7 record information comes in either from PREMIS 7 CRIS, then Southwestern Bell will take care of 8 or CRIS database. Is that correct? 8 that MS LAWSON: That is correct. MS. CHAMBERS: Right. And, MR. SRINIVASA: That's the billing 10 actually -- this is Julie Chambers with AT&T --10 11 and I've heard that the discrepancy between the 11 address? 12 MS. LAWSON: This is Beth Lawson, 12 PREMIS and CRIS database is not insignificant 13 Southwestern Bell 13 but can at times be up to 5 percent. So my The customer service record is 14 understanding of how the new address requirement 15 maintained in the CRIS billing system, so that 15 is going to be implemented would be that if 16 there is a discrepancy between the CRIS and 16 is where the service address is on the 17 customer's service record. And then also you 17 PREMIS database, that order would fall out and 18 have the service address that is utilized on the 18 then result in manual handling by the LSC. 19 address validation from the PREMIS system. So I think that that should then affect 20 MR. SRINIVASA: So the service 20 the flow-through measure. If it was actually, 21 record is the actual location of the customer? 21 you know, say, up to 5 percent, I would think 122 MS. LAWSON: Yes. 22 that we would see a decrease in the flow-23 MR. SRINIVASA: What you have in 23 through. 24 the CSR is the billing address, which could be 24 MR. SRINTVASA: Let me understand 25 different than the actual service? 25 this: You know, on Enterprise, which has multi Page 38 Page 40 MS. LAWSON: The customer service 1 campuses, they may have one billing address. 2 record has different addresses on it. It could 2 They may prefer bills to be sent to one, but the 3 have a listed address, a building address, and a 3 services may be to different addresses. So it's 4 service address. And those are identified on 4 the customer's preference that the CRIS database 5 the customer's service record by field 5 reflect a different address than the actual 6 identifiers to identify which specifically 6 service address. Is that true? 7 addresses are on there. MS. LAWSON: Maybe if I could help 8 MR. SRINTVASA: If those two are 8 you visualize -- this is Beth Lawson -- on a 9 different, how do you know -- on the LSR, how 9 customer service record, you're giving all of 10 can they populate two different addresses for 10 that type of information. So when you look at a 11 the same telephone number -- billing address 11 customer's service record, you'll see listed 12 would be different than the actual service 12 address, listed name, listed address, then 13 address? 13 you'll see the service address and then the MS. LAWSON: Well, you're looking 14 billing address. 14 15 at a service address for what you want to put 15 MR. SRINTVASA: Okay. MS. LAWSON: So it is unique 16 for the end user as far as where you want the 16 17 service provisioned, so that would be the 17 fields for the listed versus the service versus 18 address that would be utilized. 18 the billing. 19 MR. SRINTVASA: Okay. 19 MR. SRINIVASA: It's not 20 MS. LAWSON: And they should be 20 necessarily because of error those two are 21 aware that there is a difference between what is 21 different because the end-use customer wanted it 22 in the PREMIS database and the CRIS customer 22 that way, that's why you have them? 23 service record because as street names are MS. LAWSON: That's correct. In 24 changed, then PREMIS gets updated from 24 fact, a lot of times you'll have a large 25 notification from municipalities, and there's 25 business customer that all their bills for maybe

24 Bell and was finally acknowledged in their 25 effort to remove the address that it is on		telephone numbers, you get two different
	+	addresses for the same premise or is it entered
Page 42	1	Page 44
1 migration, the problems that are caused by this,	1	wrong or
2 and that's why they removed it.	2	MS. KETTLER: It's physically the
We have provided examples where we're	3	same physical address
4 required to enter maybe as many unique LSRs as	4	MR. SRINIVASA: Okay.
5 there are unique service location addresses in	5	MS. KETTLER: - for a single
6 the CRIS system so that we could get orders to		customer. It's just over the years and these
7 process through.		customer records have been out there for 10 or
8 MS. NELSON: Okay. Are you		15 years under multiple versions of PREMIS, and
9 referring to have you integrated has Birch	9	they've simply typed in incorrect addresses over
10 integrated EDI and DataGate or are you referring	10	time.
11 to LEX.	11	MR. SRINIVASA: They use that
12 MS. KETTLER: I'm referring to	1	today. It's a common database. If you are
13 LEX, the GUI interface.	13	experiencing error, they will also experience
14 MS. NELSON: Okay.	14	the same error.
15 MS. KETTLER: We have not yet	15	MS. LAWSON: This is Beth Lawson
16 converted.	16	MS. KETTLER: They do not
17 MS. NELSON: Okay. Because we're	17	experience it as a CLEC does because a CLEC is
18 really at this point focusing on EDI and	18	faced with going in to a customer and converting
19 DataGate, so	19	their entire book of business, where in all
20 MS. KETTLER: The underlying	20	reality and practicality today, Southwestern
21 problems remain the same in terms of the source	21	Bell does not do that. What they do is, they go
22 data and how they're processed. They are just	l .	in and they add new lines to a customer account.
23 different entry vehicles to get the information		When they add those new lines, then we're both
24 to Southwestern Bell.	1	on common grounds.
25 MS. NELSON: Okay. I guess on	25	But most of the CLECs today are doing

Page 47

Page 48

Page 45 1 conversions; hence, Southwestern Bell has 1 record. So when you're pulling up and wanting 2 recognized this problem and that's why finally, 2 to talk to an end user, you pull up your 3 as a consequence of their 271 proceedings, 3 customer service record because it has all your 4 agreed to on-street migrations, eliminate the 4 features, it has all of the service and 5 need for an address. 5 equipment, it has their listed, it has their MS. NELSON: Ms. Lawson? 6 6 billing. MS. LAWSON: This is Beth Lawson So when you're talking with a customer, 8 with Southwestern Bell. 8 it is in effect a record of their account. This And I guess the databases that 9 is something that I would think the CLECs would 10 Ms. Kettler is referring to are the same 10 also create their own customer care record with 11 databases that Southwestern Bell has used in 11 the appropriate information for their end-user 12 their retail operation for years. So that is 12 customer. 13 how the data was populated, when there are 13 MR. SRINIVASA: Okay. 14 changes made to suites and locations that Ms. Chambers? 14 15 buildings do, or apartment, then we get notified MS. CHAMBERS: Julie Chambers with 15 16 of that and we update the databases to get those 16 AT&T. Just to circle back for a second, on 17 in sync. 17 As municipalities change things, then 18 the issues that we've been talking about, you 18 19 we add them. We also work, if new additions are 19 know, AT&T. just as MCI indicated, I mean, had 20 being built, to add these and load them into 20 the goal, and in certain cases it is easier to 21 PREMIS. 21 integrate certain fields within pre-order and 22 So there is ongoing work, but there is 22 order. But we have asked for documentation, 23 activity that changes, suites that change to 23 we've asked for support from Southwestern Bell 24 apartment numbers or building numbers. Those 24 and have not received it. 25 types of things, it's just the nature of the Now with the potential, you know, Page 46

1 business of how locations happen. And, like I said, it's what we 3 experience in our retail world with change 4 activities. So it may not be that we're doing a 5 new connect, but we're doing change activity. 6 And if we're sending somebody out to a location, 7 we have to have a correct service address, so we 8 do experience those same types of things. MR. SRINIVASA: Let me ask, what 10 is in your PREMIS database, is validated against 11 the master street address guide, the MSAG, which 12 is the 911 type of database? You do validate 13 them -- or compare them to what is there and 14 ensure that it is accurate, don't you? MS. LAWSON: My understanding of 16 the 911, yes, does get validated. And that's 17 what, when we're doing the validation, because 18 there were a lot of streets that became streets 19 as a result of 911 that then we went in and 20 updated our CRIS records to reflect that. 21 MR. SRINTVASA: Well, the CRIS is 22 a billing record. MS. LAWSON: CRIS is a billing 24 system, but it has the customer service record 25 which contains the service address on that

1 removal of the address requirement, you know, 2 we're not sure what the impacts are going to be 3 on rejects. I mean, we've yet to see it happen. Today in the environment -- actually, 5 if you think back to the ordering-with-6 specificity requirement, you know, several years 7 ago, now suddenly something that we never 8 thought we should have had to provide that's 9 caused us all this angst over the past few years 10 is now not going to be provided. So, yes, it's a good thing, but it 12 doesn't take away from all the difficulties that 13 we've had as CLECs in learning this business. 14 And, you know, with some of the issues 15 we've talked about from a scalability issue and 16 the things that fall out from manual handling, 17 you know, for conversions, it's different than 18 for Southwestern Bell Retail. So the database 19 mismatches and things like that do affect the 20 CLECs, and we're just not sure what the impacts 21 are going to be, you know, as volumes increase. 22 MR. SRINIVASA: If address 23 information is no longer required for 24 conversions, then as far as conversions are 25 concerned, you wouldn't be impacted on a

	Pa	ge 49		Pac	ge 51
1	going-forward basis, would you agree,		1	MR. SRINIVASA: So when they say	•
	specifically that's attributable to rejects		2 "	'validate," that's validated against the master

Page 53 Page 55 those were utilizing DataGate. We do have a Southwestern Bell was moving forward 2 vendor that is trying to go national, and he has 2 with doing the concatenation. This was not 3 used one of the other interfaces. But they were 3 raised as an issue. I have the copy of the 4 able to do this with the documentation. 4 accessible letter that went out with the We have a group called the OSS Customer 5 implementation of EDI/CORBA dated March -- I'm 6 Support. When they're coming up on 6 having to -- I got new contacts; I have trouble 7 implementation for an interface, we usually go 7 seeing. I'm getting like Liz, I'm going to have 8 through a joint implementation process. We do 8 to get my half glasses -- March 24th -- Bob read 9 this with EDI ordering. We've done this. We 9 it for me -- and they're talking -- no, this 10 have daily conference calls. We work with them 10 couldn't be. I must have the wrong accessible 11 to make sure they interface before they go into 11 letter because this went out in '98. I mean, 12 production. 12 '99 was the implementation of EDI/CORBA. 13 We do the same thing on the EDI and 13 The point I'm trying to make is, when 14 CORBA pre-order interfaces as well as DataGate. 14 we implemented EDI/CORBA, there was no issue 15 But they have been able to do the integration 15 about us implementing the concatenated for the 16 and have not requested any special technical 16 customer service record. This was not brought 17 assistance. If they had done that, we would be 17 up as an issue, that this is not how we want to 18 more than willing to sit down and work with them 18 move forward. So we have no request from any 19 if they're having problems with doing that 19 CLEC that requested when we implemented 20 integration. 20 EDI/CORBA pre-ordering, that this be a 21 MS. NELSON: I guess I would like 21 requirement. 22 to know from AT&T what specific information that 22 MS. NELSON: You indicated that 23 you've requested that Southwestern Bell has not 23 AT&T hadn't asked for parsing documentation in 24 provided? 24 any collaborative sessions or anything. Have 25 MS. CHAMBERS: Our technical SMEs 25 they asked your account managers for parsing Page 54 Page 56 1 have been asking since November of '98 for the 1 documentation? 2 specific parsing conventions and actually for MR. BANNECKER: This is Bob 3 Southwestern Bell to provide, you know, parsed 3 Bannecker, Southwestern Bell. 4 addresses via DataGate. I mean, there's been. Any parsing discussion, we provided 5 you know, several discussions over the past few 5 everything that we have documentation-wise on 6 parsing. I think to Ms. Chambers' point, what 6 years. But then as recently -- at our account 7 they were asking for is for us to provide the 8 team meeting back in February, we actually have 8 parsing functionality in DataGate which at the 9 a request again for the parsing documentation. 9 time we said was not available. 10 You know, if Southwestern Bell successfully did 10 MS. CHAMBERS: Julie Chambers with 11 it for EDI/CORBA, which is the front end to 11 AT&T. I think we've asked for both. But I 12 DataGate, then could we also have that technical 12 13 documentation to assist us in doing the same 13 have an e-mail where, you know, we actually 14 thing? 14 said, "Is there a set of requirements that SWBT 15 MS. NELSON: Southwestern Bell? 15 can provide to AT&T for parsing?" 16 MS. LAWSON: This is Beth Lawson. And, Bob, I know that you're familiar 16 This issue Ms. Chambers says has been 17 with Bill Frost and, you know, the many 17

25 individually parsed.

21

18 an issue since November '98, this has never been

22 the way this was implemented, there are choices

23 on how you can implement it, whether you do it

24 concatenated or whether or not you do it

Also when EDI/CORBA was implemented,

19 brought up in any of the collaborative

20 processes, the workshops.

18 discussions that have occurred without, you know,

19 even our involvement around these issues. So

20 it's not a new issue by any means from AT&T's

23 Bannecker again with Southwestern Bell.

MR. BANNECKER: This is Bob

To that point, though, I do know that

25 Bill early on had requested some information on

21 perspective.

22

24

PROJECT NO. 20400	MONDAY, APRIL 17, 2000
Page 57	Page 59
1 how we mapped our systems. But I think the	1 but, yet, we also receive LASR edits for those
2 response that we gave back to AT&T was that we	2 types of errors as well. And so it's just
3 cited some industry documentation that indicated	3 confusing to us as to why those types of errors
4 that's how we had our mapping set up. So, I	4 would be coming back in the jeopardy post-FOC.
5 mean, that was the response that we provided	5 MR. SRINIVASA: When you say
6 back.	6 "invalid due date," you entered a due date that
7 MS. CHAMBERS: In speaking with	7 was already past, and then
8 our technical people and I would like to	8 MS. HALL: Exactly.
9 think that we have some very competent	9 MR. SRINIVASA: It doesn't get
10 developers on our project and they have	10 rejected up front in the LASR?
11 indicated that it to date has not been helpful	11 MS. HALL: That's my confusion.
12 what has been provided.	12 Exactly.
13 MS. LAWSON: And this is Beth	13 MR. NOLAND: This is Brian Noland
14 Lawson with Southwestern Bell.	14 with Southwestern Bell.
15 And the only response I can give is, we	Just to make a point of clarification
16 know there's been at least five that have done	16 from the earlier discussion on the jeopardy
17 it with all three pre-order interfaces EDI,	17 notification, there are other reject reasons in
18 CORBA, and DataGate so it has been done.	18 there you know, not specific to address
19 MS. CHAMBERS: But as far as, you	19 that do cause us to have performance measurements
20 know, integrating address validation component	20 that are missed, just to make that point.
21 of DataGate with EDI/CORBA, you know, I'm not	21 But to address the specific discussion
22 aware that this is I mean, EDI ordering	22 that we're having right now, I mean, we would
23 I'm not aware that it has been done.	23 just have to look at each of the individual
24 Also in Sage's letter, they actually	24 instances to evaluate what it is that's causing
25 indicate that there was documentation and	25 the reject or jeopardy notification to occur.
Page 58	Page 60
1 technical assistance provided by Southwestern	1 MS. LAWSON: This is Beth Lawson.
2 Bell, so I'm surprised to hear today that no	2 I guess my request would be, if this is
3 technical assistance was provided to these other	3 occurring and you think you should have been
4 CLECs.	4 receiving it in an up-front, please bring it to
5 MS. LAWSON: This is Beth Lawson.	5 our attention and let's investigate and look at
6 As far as technical assistance, there	6 it because if it is an edit that should have
7 was no special request for us to sit down and	7 been taking place and they've receiving on a
8 talk with them. They basically got the	8 jeopardy, please let us know those, and we would
9 documentation and then were able to implement	9 be more than willing to look at and try to
10 this.	10 explain what has happened.
And with EDI/CORBA, again that is what	11 MS. HALL: I would like to do that
12 the CLECs are normally using for address	12 because just as of March, we had had 77
13 validation because that is the industry standard,	13 jeopardies come back for invalid due date.
14 and it's parsed.	14 MS. NELSON: Okay.
MS. NELSON: Okay. On the 23	15 MS. CHAMBERS: And that's after
16 percent UNE-P orders or LSRs that were rejected	16 the due date has been confirmed on the FOC.
17 or were sent back as jeopardies, I wanted to go	17 MS. HALL: The other thing is, we
18 back to AT&T. And one of the reasons you said	18 had consistently asked for edits to be moved up
19 was invalid address. Can you identify anything	19 front, and we haven't been seeing, you know,
20 else?	20 edits being moved up front to LASR, and now
MS. HALL: One thing I did want to	21 we're seeing some that we thought were on LASR
22 mention is the fact that we're receiving	22 now showing up as jeopardy.
23 jeopardies for what we think would be up-front	23 MS. NELSON: From a percentage
24 edits. For instance, invalid TN, invalid due	24 standpoint, can you tell me what percentage of
25 date is now coming back to us as a jeopardy;	25 invalid address or desired due date you would

```
Page 61
  1 receive up-front rejects and what percentage you
                                                              1 three days a week and then twice a week, and now
  2 would get in jeopardies?
                                                              2 we have decided, as of next week, one day a week
            MS. HALL: I know that 36 percent
                                                              3 we will continue these conference calls.
  4 is the percentage that we have for both address
                                                                     In those conference calls, these
  5 and what we would consider what should be
                                                              5 jeopardies have not been questioned as far as
  6 up-front edits, like invalid due dates and
                                                              6 asking for Southwestern Bell's assistance from
  7 invalid TN.
                                                              7 the LSE or the account team, as far as I'm
            MR. SRINIVASA: Let me ask you
                                                              8 aware, in explaining why they are receiving
 9 this: You've sent out an LSC, and they sent you
                                                              9 invalid or jeopardies on due dates, invalid TNs,
 10 the firm order confirmation back with the due
                                                             10 address and invalid feature specific to the
 11 date. Could you supplement the order after
                                                             11 jeopardy process or why those items are being
 12 that, they came back and told you the due date
                                                             12 returned as jeopardies.
 13 cannot be met? Order supplements cannot flow
                                                             13
                                                                     The invalid due dates that we're
 14 through.
                                                             14 receiving are due dates -- invalid due date
                                                             15 interim, invalid due dates as far as requesting
 15
            MS. HALL: This is not a
 16 supplement issue. This was just an order that
                                                             16 due dates on holidays or weekends, situations
 17 had a due date on it, passed the LASR errors,
                                                             17 such as that.
 18 went through SORD, and then we received a
                                                             18
                                                                        MR. SRINIVASA: The LASR edit did
19 jeopardy, a 1T jeopardy code, the description
                                                             19 not catch those. It was a weekend.
20 being invalid due date or invalid TN.
                                                                        MS. EGGEN: That is correct.
                                                            20
21
            MS. NELSON: Okay. So 36 percent
                                                             21 We're speaking simply of the jeopardy process
22 of orders -- LSRs that came back for invalid TN
                                                             22 which is after FOC.
23 or invalid address -- I mean, invalid address or
                                                             23
                                                                        MS. CHAMBERS: This is Julie
24 desired due date came back as jeopardies?
                                                             24 Chambers with AT&T.
            MS. HALL: Right. Actually, those
                                                             25
                                                                     And we have had extensive conversations
25
                                                   Page 62
                                                                                                                Page 64
 1 are all -- that percentage was all of the errors
                                                              1 about jeopardies and in learning about the
 2 that we would think should be up front and not
                                                              2 different categories that Southwestern Bell --
 3 coming back as jeopardy.
                                                             3 because this is new to AT&T as well -- the
            MR. NELSON: Okay. So what would
                                                              4 different categories. So to say that -- you
 5 the --
                                                              5 know, I think it does go back to the fact that,
            MS. HALL: And that actually would
                                                             6 you know, we've thought a lot of these edits
 6
 7 be 36 percent for UNE-L orders.
                                                             7 were going to be moved up, you know, over the
            MS. NELSON: Okay. What would the
                                                             8 past couple years, and now they're still
 9 total universe of those be? Could you describe
                                                             9 actually showing up as jeopardies.
10 them? You said telephone number, desired due
                                                             10
                                                                     And to find out an invalid due date
11 date, address. Is there anything else that
                                                             11 that late in the process, after the FOC has
12 would be included?
                                                             12 confirmed the due date, is concerning. And I
                                                            13 think the calls continue, and we're continuing
13
            MS. HALL: Invalid feature is
14 another one. It looks like that's about it.
                                                            14 to learn more about the processes.
                                                                     I think initially we were working to
15
            MS. NELSON: Okay. And does
                                                            16 make sure that the processes were working, that
16 somebody from Southwestern Bell want to respond
17 to that?
                                                            17 we were getting the new due dates for
18
           MS. EGGEN: Yes. This is Mary Ann
                                                            18 notification of due date and things like that.
19 Eggen, Southwestern Bell.
                                                            19 And we're working through the processes, and
20
         We have had conference calls with AT&T.
                                                            20 jeopardies has been a major issue discussed on
21 During the month of March, I believe we were --
                                                            21 the calls.
22 the beginning of March, we were on daily
                                                            22
                                                                        MS. NELSON: From Southwestern
23 conference calls with the AT&T centers. Julie
                                                            23 Bell, can you explain in what instances you
24 Chambers and Lori Hall.
                                                            24 would -- an invalid due date would reject back
25
         We have now moved down -- we've gone to
                                                            25 and then also in what instances you would get a
```

PROJECT NO. 20400	MONDAY, APRIL 17, 2000
Page 65	
1 due date back as a jeopardy instead of a reject?	1 MS. WEGER: That's correct.
2 MS. WEGER: This is Misty Weger,	2 MR. BANNECKER: This is Bob
3 Southwestern Bell.	3 Bannecker, Southwestern Bell.
4 A lot of the invalid due dates that we	4 I just wanted to clarify: The only
5 see on AT&T's jeopardies are generally when they	5 LASR edit that's out there is that LASR
6 have jumped the due date board, and it's not	6 validation. The due date that's given on the
7 always necessarily the due date board wasn't	7 order is not prior to today. That's the only
8 looked at or something	8 LASR edit there is for due dates.
9 MS. NELSON: Could you explain	9 MS. NELSON: Okay. Does that
10 that	10 differ from AT&T's understanding?
11 MS. WEGER: Sure.	11 MS. HALL: Yes, because we've had
12 MS. NELSON: - that sort of	12 instances where
13 lingo.	MS. NELSON: Could you stand up,
MS. WEGER: Sure. They'll send in	14 please, and identify
15 something that requires field work. Anything	15 MS. HALL: Lori Hall with AT&T.
16 that requires field work, as a general rule, you	16 And we've had instances where, you
17 go to the due date board, and I believe it's in	17 know, we select a due date from the due date
18 DataGate where you have that. They go in and	18 board, you know, at 12 o'clock noon. By the
19 find the next available due date according to	19 time it gets to Southwestern Bell and they work
20 the due date board.	20 the order, it's past 3 o'clock, and so we get
21 MS. NELSON: So what you're saying	21 a I'm sorry, not past 3 o'clock, but that due
22 in essence is, the due date would be different,	22 date is not available anymore, and we get an
23 depending on a field that was required or if	23 invalid due date error up front for that.
24 there was no field work?	24 Also I wanted to bring to your
25 MS. WEGER: Absolutely.	25 attention I was just looking at my list of
Page 66	Page 68
1 MS. NELSON: Okay.	1 all the jeopardy reasons. Another reason we get
2 MS. WEGER: Yes. They'll send it	2 jeopardies would be for requested due date is
3 in, and maybe, you know, we show that the 6th is	3 less than published interval. So, to me, that
4 the next available due date, and they have sent	4 would mean that I mean, perhaps the due date
5 in the 4th or the 5th or whatever. So we would	5 board might I mean, if we're selecting a due
6 reject that, jeopardy in these cases back for	6 date off the due date board and getting a
7 invalid due date.	7 jeopardy, a post-FOC error jeopardy type for
8 MS. NELSON: Okay. Why would it	8 published interval, you know, invalid due date,
9 come back as a jeopardy and not as a reject?	9 because we're less than the published interval,
10 MS. WEGER: Because-there is no	10 another category, and it should be up front.
11 LASR edit on those types of things. There is a	MR. NOLAND: This is Brian Noland
12 LASR edit and I'm not completely familiar	12 with Southwestern Bell.
13 with all of them but I know that a lot of the	13 I guess without knowing all the
14 LASR fatals that they get back on due dates or	14 particulars in that situation that was just
15 when they send in the previous day due date or a	15 described I mean, the type of order that was
16 day that has to be today or future, is the LASR	16 requested, because of the UNE intervals that we
17 edit that they get. They send it in yesterday's	17 have for due dates as opposed to other types of
18 due date or, you know, last week's due date or	18 services, so I'm just not real clear about, you
19 something.	19 know, what that example that was given then.
20 MS. NELSON: So, in other words,	20 MS. KETTLER: This is Patti
21 if a CLEC made a mistake and gave no field work	21 Kettler with Birch Telecom.
22 due date instead of a field work due date,	22 If I might reinforce, we were very
23 that's not caught up front as LASR edit, that	23 actively involved, after this process change
24 doesn't get sent back until it's a jeopardy	24 occurred in January, with the post-FOC jeopardy
25 after	25 process because there was very little

```
Page 69
                                                                                                               Page 71
 1 documentation of a process change, and no one
                                                             1 was done to accommodate AT&T and to deal with
 2 really knew what was going on. We did in-depth
                                                             2 what AT&T said was the proper way to be handling
 3 analysis from January through February because
                                                             3 it, so that's the way it's been put in place on
 4 we have like a five-fold increase in jeopardies.
                                                             4 the issue of jeopardy occurring post-FOC.
        As a result of that weekly conference
                                                                       MS. NELSON: Okay. We're going to
 6 call analysis, we saw a decline because they
                                                             6 go off the record and take like a 20-minute
 7 started yelling in the field, "You can't do
                                                             7 break. And in the interim I would like
 8 this. This is inappropriate," or whatever, and
                                                             8 Southwestern Bell and AT&T to talk about this
9 we are now seeing it begin to increase because
                                                             9 and try to figure out what common ground there
10 we haven't continued to manage it, micromanage
                                                            10 is because it does seem to be inconsistent with
11 it on a daily or weekly basis with the LSC.
                                                            11 what we've been hearing on a staff level.
12
        But the problem is resurfacing again.
                                                            12
                                                                    Yes, Mr. Cowlishaw.
13 And as with many other issues that we've had of
                                                            13
                                                                       MR. COWLISHAW: Pat Cowlishaw for
14 a manual nature, we will begin revisiting this
                                                            14 AT&T.
15 issue with Southwestern Bell in our weekly
                                                            15
                                                                    I just wanted to mention before you
16 conference calls because the volumes are
                                                            16 closed out the record at the moment, that AT&T
17 dramatically increasing again.
                                                            17 did make specific proposals of performance
                                                            18 measures around jeopardy notices and specifically
           MR. MURRAY: Judge Nelson, if I
18
                                                            19 going to this point of the category of jeopardy
19 might? I mean, I think we've gotten far afield
20 from the integration discussion that we were
                                                            20 notices that are the result of these post-FOC
                                                            21 edits that are now, instead of resulting in a
21 having. We don't have the people here that we
22 need to respond to claims like this, on
                                                            22 manual reject, are now resulting in the creation
23 jeopardies in particular. I think that a lot of
                                                            23 of this new category of jeopardy. So in terms
                                                            24 of germaneness to today's discussion, I think we
24 things that's been raised that are not
                                                            25 have teed this up.
25 accurately stated that, you know, we're not
                                                   Page 70
                                                                                                               Page 72
1 prepared to respond to simply because we weren't
                                                                       MS. MURRAY: But when that issue
                                                             2 is prepared -- you know, when we're all prepared
           MS. LaVALLE: Kathleen LaValle for
                                                             3 to discuss this issue, which I think is
                                                             4 elsewhere in the matrix.
```

2 aware that they were going to be raised here. 4 AT&T. PM 9 was specifically on the 6 Commission's agenda for today, which is the rate 7 of rejects. And part of the story of the rate 8 of rejects which, although the numbers still 9 remain alarmingly high -- I think it's 31 10 percent on an all-CLEC basis -- that we wanted 11 to make it clear that a shift has taken place so 12 that some of those -- and some of the longest 13 return rejects have now been recategorized into 14 jeopardy. So I think our responses are all very 15 directly apt to the topics that have been 16 included for today's discussion. MS. NELSON: My question to AT&T 17 18 and all the CLECs would be to ask if this issue 19 has been raised before today? 20 MS. LaVALLE: Yes. 21 MS. MURRAY: I might respond to 22 that. 23 Particularly the jeopardy issue was put

in place at AT&T'S specific request during
 Docket 21000 meeting, so this is something that

MS. NELSON: Okay. We'll, we're 6 going to come back in 20 minutes. And in the 7 interim, I would like for everybody to discuss 8 this. 9 Let's go off the record. 10 (Off the record: 10:29 a.m.-11:16 a.m.) MS. NELSON: Let's go back on the 11 12 record, then. Off line, AT&T and Southwestern Bell 14 talked about the issues that we were discussing 15 before the break. And my understanding is, 16 you're ready to report back? MS. MURRAY: That's correct. 17 MS. NELSON: Okay. 18 19 MS. LaVALLE: Kathleen LaValle for 20 AT&T. AT&T and Southwestern Bell 21 22 representatives met over the course of the break 23 and discussed the occurrence of jeopardy returns, 24 post-firm order confirmation and our concern

25 that those were in effect deferred edit

```
PROJECT NO. 20400
                                                                                       MONDAY, APRIL 17, 2000
                                                    Page 73
                                                                                                                Page 75
 1 conditions.
                                                              1 increase its up-front edit capability.
        And I think what we were able to do is
                                                                        MS. NELSON: Okay. And even with
 3 come to a common ground in identifying what the
                                                              3 up-front edit capability, is it true that there
 4 source of the concern is. And that is that AT&T
                                                              4 still will be jeopardies returned from time to
 5 would like to see an enhancement in the up-front
                                                              5 time or a certain percentage of the time for
 6 edit capability from Southwestern Bell so that
                                                              6 addresses or due dates?
 7 to the full extent possible, error conditions
                                                                        MS. WEGER: Absolutely -- this is
 8 are detected at either the LASR or the MOG stage
                                                              8 Misty with Southwestern Bell Telephone --
9 so that they can be electronically generated and
                                                              9 absolutely. Something that came up before the
10 a reject returned quickly.
                                                             10 break was that they weren't getting addresses
11
        And I think we agreed that this is an
                                                             11 and that that should be, that there is a
12 issue -- enhancing the up-front edit capability
                                                             12 validation process up front to validate that.
13 is an issue that has been a focus of AT&T and
                                                             13
                                                                     What happens is, in our PREMIS
14 other CLECs' concerns throughout the
                                                             14 database, we validate against a range. The way
15 collaborative, dating back to the original 271
                                                             15 PREMIS works is, for instance, on a particular
                                                             16 street, perhaps 200 through 1000 are valid
16 hearing.
                                                             17 addresses. There may only be homes or business
17
        And also in Docket 19000, I know
                                                             18 or whatever at 204 and 208 and 212. But if you
18 Ms. Murray and I worked together on that issue
19 as well, and our concern is that in terms of
                                                             19 try to validate 205, it will pull up and say
20 jeopardies at best, first of all, you're still
                                                             20 that, "Yes, this is in the valid range on that
21 getting -- even if you don't look at the
                                                             21 street" and will validate, saying, "Yes, this is
22 jeopardies, you're still having 35 percent of
                                                            22 a good address."
23 the rejects coming back, on an all-CLEC basis
                                                                     So they could send over, you know,
                                                            23
24 are coming back over the LASR GUI, meaning
                                                            24 anyone. This happens in retail as well, but
25 they're manually generated. So that is, as a
                                                             25 this is the exact way that it works there. They
                                                   Page 74
                                                                                                                Page 76
                                                              1 could send 205, whatever street, and it would
        The implementation that took place on
                                                             2 validate. And until that technician went out to
                                                             3 205 and said -- they would call back in to us
4 into jeopardies has the following two impacts on
                                                             4 and say, "Hey, there is no 205, that this is
```

1 stand- alone statistic, an issue of concern. 3 January 17th that converted post-FOC rejects 5 the performance measure data that's reported: 6 First of all, it will artificially decrease the 7 number of rejects reported in PM 9 --MS. MURRAY: Judge Nelson, if I 9 might --MS. LaVALLE: - and some of those 11 have been shifted over --MS. NELSON: Okay. Yes. I really 12 13 want to know --14 MS. MURRAY: - this is going way 15 beyond what we agreed to here. 16 MS. NELSON: I just want to know 17 what the common ground is on. MR. LaVALLE: The common ground, I 18 19 think, is that we've identified that it's really 20 an issue of long-standing, not a new issue. The 21 only change is that now some of those late-22 returned manual rejects are coming back as 23 jeopardies, and I think that the companies are 24 going to be analyzing those returned, and AT&T

5 invalid," and that's why they get the field 6 visit determined address invalid. That's why 7 that icopardy goes back. 8 MS. NELSON: Okay. And --MS. WEGER: So there still will be 9 10 instances where they'll get an invalid address. MS. NELSON: Okay. And going back 11 12 a minute, Ms. Murray, did you have anything to 13 add in terms --MS. MURRAY: Yes. 14 15 MS. NELSON: - of what you 16 discussed during the break? 17 MS. MURRAY: Yes. I think I just 18 wanted to make sure that it was clear to the 19 Commission that this is not something new that 20 has recently developed that is creating an issue 21 that wasn't here before. This is a continuation 22 of the issue related to Southwestern Bell and 23 AT&T's request that Southwestern Bell move as 24 many edit conditions, SORD edit conditions as

25 possible into the up-front systems.

25 will continue to urge Southwestern Bell to

Page 77 We worked with AT&T collaboratively on 2 doing that for quite some period of time. Misty 3 and the AT&T representatives have a meeting and 4 conference calls to discuss these issues. We'll 5 continue to work and try to move as much of 6 these edits up front as we can, working 7 collaboratively together to do that. MS. LaVALLE: And our concern, 9 obviously, is we would have liked the progress 10 to have come further at this point because it 11 has been an issue of such longstanding. 12 MS. MURRAY: And, you know, moving 13 edits up is something we're doing on a continual 14 basis through changed management and otherwise, 15 and we're going to continue to work that 16 process. 17 MS. LaVALLE: We had two other 18 issues of clarification, just so we don't leave 19 them, if Ms. Chambers might be permitted to 20 address those briefly. MS. NELSON: Okay. Do the 21 22 Southwestern Bell people have other 23 clarification also on the record? 24 Well, let's go ahead and start with 25 AT&T, then.

Page 79 On the same note, the final staff 2 status report required that the ability to 3 integrate DataGate pre-order and EDI order be 4 evaluated, and that was not tested. So to date, 5 there is no commercial data reporting that there 6 is an ability to integrate EDI/CORBA and EDI. So I just wanted to clarify that. But 8 I think overall, if you're kind of wondering 9 where do we stand as of today, this is kind of 10 relating to the parsing issues. And then if you 11 look at where do we stand as of 5/27, I guess is 12 the address -- is the next release -- I think 13 after the address requirement is removed for 14 conversion, you will still have the parsing --15 as we mentioned previously, you will still have 16 the parsing issues for some order types that 17 we've talked about previously, the new -- the 18 migrate with new. We would have to then reevaluate the 19 20 reject statistics and the actual just reject 21 experience after the implementation of that 22 release. I think we don't know what the impacts 23 will be because you receive the address edits.

1 MS. CHAMBERS: Julie Chambers with 2 AT&T.

I just thought I might try to settle
some of the disagreement and conversation that
we had prior to the break related to technical
assistance and documentation for parsing.
Actually, in Hamm reply affidavit, she

Actually, in Hamm reply affidavit, she actually states that,

"AT&T initially requested Southwestern

10 Bell, via its account manager, to parse 11 information in DataGate in November 1998, and 12 that SWBT, in response, suggested AT&T wait for 13 EDI/CORBA."

So if we had waited for the functionality in EDI/CORBA, we probably would not still be in business -- I mean, we would not yet be able to serve customers today.

not still be in business -- I mean, we would not
yet be able to serve customers today.
Also, I think what was mentioned was
that nothing has been said in the collaborative.
If you think about the dates, the collaboratives

21 ended about November of the same time frame that 22 we were, you know, working with our account team

23 to try to, you know, either have Southwestern 24 Bell do the parsing or assist us in giving us

25 the documentation to do the parsing ourselves.

Page 78

1 any other edits. So I think we'll just have to 2 completely relook and reanalyze where we stand 3 from a reject basis at that point.

24 And before you receive -- you know, for format

25 and things like that -- before you would receive

MS. NELSON: Okay. Would that be appropriate in change management or in an OSS users group format? Are you talking about company-to-company?

MS. CHAMBERS: I'm just saying
that in general, if you're asking what are the
impacts going to be from this release, you know,
twe don't know. I mean, I think we're going to
have to look at it at that point because it does
change the landscape of what we've been looking

15 And then I think again we have to see 16 it implemented. It is an expedite release. 17 It's, you know, a short time frame to

18 implementation, and I think all CLECs have 19 expressed concern in change management about

20 expedite releases and the testing; you know,

21 platforms currently available. So I think that, 22 you know, we'll see it implemented, we'll have

23 to, you know, then take a look at the actual

24 impacts and benefits thereof.

14 at to date.

Again, you will have the mismatch issue

MONDAY, APRIL 17, 2000 PROJECT NO. 20400 Page 85 Page 87 1 are returned in a concatenated format identical 1 wasn't available. 2 to the editing and values required on the So you normally would take a process 3 ordering side and then, two, where is the 3 prior to going through your account manager, of 4 thoroughfare value in the concatenated? 4 reviewing it, the SWBT materials or other MS. NELSON: Does Southwestern 5 materials located on Web site. If it gives you 6 Bell want to respond to that? 6 the answer, it saves a lot of phone calls. MS. LAWSON: This is Beth Lawson MS. LAWSON: This is Southwestern 8 with Southwestern Bell. 8 Bell, Beth Lawson. And we do have documentation available I guess my response will be, if you've 10 that identifies the fields laid out, and we can 10 got any issues or questions, we'll be more than 11 work with your account manager to specifically 11 happy to sit down and talk with you. Again, 12 respond to those questions if you have them, but 12 we've had CLECs that have done this successfully. 13 we have provided documentation that details 13 MR. SRINIVASA: So did you have to 14 talk to those CLECs also? Did they have similar 14 that MS. McMILLON: And this is Terri 15 type of questions? 15 16 McMillon again. 16 MS. LAWSON: Not to my knowledge. 17 When we talked about the technical assistance, We have been reviewing a lot of that 18 documentation, Beth, just like David said 18 the documentation that was provided to them, 19 earlier. But we are finding discrepancies where 19 they were able to utilize and implement the 20 in the pre-order documentation, the field lengths 20 integration. 21 will be ten characters, and in the order field, 21 MS. KETTLER: Birch Telecom looks 22 it's eight characters. Well, that's not an 22 forward to taking advantage of these 23 exact match. And it's very difficult, without 23 opportunities, so I hope that here in the next 24 very specific business rules, to find out what 24 few weeks, that we'll have that same opportunity 25 we need to send to keep from getting that reject 25 to be exposed to the support systems, the Page 86 Page 88 1 complete documentation, et cetera. 1 again. MR. SRINIVASA: Also another MS. NELSON: And then when you 3 find that inconsistency, do you contact your 3 enhancement you had made to that process, you 4 added GEIS. General Electric, to help in that? 4 account manager and ask: How are we supposed to MS. LAWSON: That is correct, and 5 handle this? 6 I mentioned that earlier, that as a consultant. 6 MS. McMILLON: We will, yes. 7 Southwestern Bell has contracted with GEIS to MS. NELSON: Okay. But you 8 act on the CLECs' behalf to come and consult 8 haven't so far? 9 with you on your interfaces and any integration 9 MS. McMILLON: He's just been 10 doing the review. 10 or questions that you have. 11 MS. McMILLON: This is Terri 11 MR. BURLEY: Dave Burley from MCI 12 McMillon again from MCI WorldCom. 12 WorldCom. As a prelude to before you go through I just did want to set the record 14 straight. We have been working with our account

14 that formal process, you would certainly access 15 the SWBT Web site, provided you have a valid 16 password and that nature there, and attempt to 17 secure. I mean, all we're reasonably 18 intelligent in this world, and we can work 19 through the business rules if they're finite and

21 The problem is like for a week and a 22 half attempting to get into the USOC manual. 23 Anybody getting in there was getting invalid 24 entry, no matter what you put into there; yet, 25 the CLEC community didn't even know that it

> KENNEDY REPORTING SERVICE, INC. (512)474-2233

15 team and asking questions about EDI pre-order.

In addition, way back when the meeting 20 that has been discussed by AT&T, we participated

MS. LAWSON: Can I just comment?

MR. SRINIVASA: Well, let me ask

16 We did want to get that ball rolling and did 17 specify at that time that we were interested in

21 in that. And during that meeting, we also

22 stated that we feel like it's very necessary to

18 fully parsed CSRs.

23 have parsed CSRs.

19

24

The service address will be pulled from the customer service record on the CRIS account database.	Page 92

25 an extent?

25 providing delimiting for the address fields,

1 that doesn't apply to directory listing. Right? 2 I mean, that still comes with no delimiters? 3 MS. COX. This is Lori Cox. 4 And I have no admit, I have not 5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases 17 well, the databases that might contain address in information. And did you provide a percentage of that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 NO, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECS tried to make this also an issue in 14 panacea to fix everything. 1 In the directory delivery or the listed 4 because of changes, they re updated in PREMIS. 5 and then we subsequently update it in CRIS so 6 that the records match. 2 that the records match. 3 explained, when municipalities send us updates 4 because of changes, they re updated in PREMIS. 5 and then we subsequently update it in CRIS so 6 that the records match. 4 because of changes, they re updated in PREMIS. 5 and then we subsequently update it in CRIS so 6 that the records match. 5 and then we subsequently update it in CRIS so 6 that the records match. 7 There could be a timing in that the service order hasn't posted and an LSR comes of that decause in PREMIS. 5 and then we subsequently update it in CRIS so 6 that the records match. 10 c	ROJECT	U. ZUTUU
1 that doesn't apply to directory listing. Right? 2 I mean, that still comes with no delimiters? 3 MS. COX. This is Lori Cox. 4 And I have no admit, I have not 5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases 17 well, the databases that might contain address in information. And did you provide a percentage of that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to lo have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECS tried to make this also an issue in 14 panacea to fix everything. 15 Interpolate the time reuse of that the records match. 16 that the records match. 17 There could be a timing in that the service order hasn't posted and an LSR comes 18 service order hasn't posted and an LSR comes 19 through, but this should not be an issue that the service order hasn't posted and an LSR comes 10 that the records match. 11 MS. McMILLON: Okay. 12 MS. LAWSON: If there has been the service order hasn't problems. 12 MS. LAWSON: If there has been the service order hasn't problems. 13 MS. McMILLON: Barrier problems. 14 There could be a timing in that the service order hasn't problems. 15 MS. McMILLON: Barrier problems. 16 the there could be a timing in	Page 93	Page 95
2 I mean, that still comes with no delimiters? 3 MS. COX: This is Lori Cox. 4 And I have no admit, I have not 5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: Listed address. 16 discussed mismatches in the address databases— 17 well, the databases that might contain address is information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 3 No, I did not. My understanding, that 4 it's very minimal. 25 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a— 4 MS. LAWSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. Is there any 6 plan — the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to have address mismatches that won't be fixed by 11 this release. And I guess it's important — and 12 the CLECS tried to make this also an issue in 13 change management — that this is not the 14 panacea to fix everything. 2 I deliwery address. 3 and then we subsequently update it in CRIS so that the records match. 5 and then we subsequently update it in CRIS so that the records match. 7 There could be a timing in that the service order hasn't posted and an LSR comes 9 through, but this should not be an issue that to causes any type of problems. 10 causes any type of problems. 110 causes any type of problems. 111 sometical machine in CRIS so that the records match. 12 that the records match. 13 service order hasn't posted and an LSR comes 9 through, but this should not be an issue that to causes any type of problems. 110 causes any type of problems. 110 causes any type of	oly to directory listing. Right? 1 percentage. This is the same situation we w	
3 explained, when municipalities send us updates 4 And I have no admit, I have not 5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 11 MS. McMILLON: Listing. 11 MS. McMILLON: Listing. 11 MS. McMILLON: And we had briefly 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases — 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a — 4 MS. LAWSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a — 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a — 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a — 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a — 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So we're still going to 10 have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important — and 12 the CLECS tried to make this also an issue in 13 change management — that this is not the 14 panacea to fix everything.		
4 because of changes, they're updated in PREMIS. 5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. McMILLON: Okay. So 5 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 7 There could be a timing in that the 8 service order hasn't posted and an LSR comes 9 through, but this should not be an issue that 10 causes any type of problems. 11 MS. McMILLON: Okay. 12 MS. NELSON: Are you saying that 13 your retail is affected similarly? 14 MS. LAWSON: If there is when 15 they go in to do a change order and it matches 16 against something, I mean, we have to update the 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. LAWSON: It doesn't have 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. McMILLON: Okay. So 26 MS. McMILLON: Okay. So 27 MS. LAWSON: Regarded an LSR comes 28 through, but this should not be an issue that 29 out rotail is affected similarly? 29 MS. LAWSON: If there is when 29 they go in to do a change order and it matches 20 data. 21 MS. LAWSON: It doesn't have 22 mything to do with integration at all. 23 MS. NELSON: A database 24 it's very minimal. 25 MS. McMILLON: Okay. So 26 MS. McMILLON: Okay. So 27 MS. LAWSON: Extable that we are going 28 to have address mismatches because they		
5 investigated that. I do know that the rules 6 apply to the service address and the listed 7 address. I don't know about the directory 8 delivery address. 9 MS_LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS_MCMILLON: Listing. 12 MS_LAWSON: Listed address. 13 MS_COX: Should have the same 14 values. 15 MS_MCMILLON: And we had briefly 16 discussed mismatches in the address databases— 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS_LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS_MCMILLON: Okay. So 3 Southwestern Bell doesn't have a— 4 MS_LAWSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS_MCMILLON: Okay. So 3 Southwestern Bell doesn't have a— 4 MS_LAWSON: No. 5 MS_MCMILLON: Okay. Is there any 6 plan — the concern is still that we are going 7 to have address mismatches bet auxen with the irrectords match the records match the could be a timing in that the 8 service order hasn't posted and an LSR comes 9 through, but this should not be an issue that 12 mS_MCMILLON: Okay. 12 MS_MCMILLON: Okay. Are you saying that 13 your retail is affected similarly? 14 MS_LAWSON: If there is — when 15 they go in to do a change order and it matches 16 against something, I mean, we have to update the 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS_LAWSON: Is this an 20 integration issue or a database issue? 21 MS_LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS_NELSON: Okay. 24 MS_NELSON: Okay. 25 MS_NELSON: Okay. 26 MS_NELSON: Is this and 27 MS_LAWSON: It doesn't have 28 anytype of problems. 29 through, but this should not be an issue that 29 of the address mismatches because of the hardess are vice order hasn't posted and an LSR comes 29 through, but this should not be an issue that 29 doesn't have in CRIS and 30 own with ins		
6 that the records match. 7 address. I don't know about the directory 8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an 26 with Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to o have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECS tried to make this also an issue in 14 panacea to fix everything. 6 that the records match. 7 Threr could be a timing in that the 8 service order hasn't posted and an LSR comes 9 through, but this should not be an issue that 10 causes any type of problems. 11 MS. McMILLON: Okay. 12 MS. NELSON: Are you saying that 13 your retail is affected similarly? 14 MS. LAWSON: If there is when 15 they go in to do a change order and it matches 16 against something, I mean, we have to update the 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. NELSON: Is this an 20 integration issue or a database issue? 21 MS. NELSON: Okay. 22 MR. SRINIVASA: A database 23 accuracy issue. 24 MS. LAWSON: If there is when 25 MS. LAWSON: Is there any 26 they of the address and the service of the address of the address of the address of the address of		
8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECS tried to make this also an issue in 13 change management that this is not the 8 service order hasn't posted and an LSR comes 9 through, but this should not be an issue that 10 causes any type of problems. 11 MS. McMILLON: Okay. 11 MS. McMILLON: Okay. 12 MS. LAWSON: Are you saying that 13 your retail is affected similarly? 16 discussed mismatches in the address dimilarly? 16 databases answer that in should not be an issue that 18 some type of problems. 11 MS. McMILLON: Okay. 16 database susmitating, that 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. NELSON: Is this an 20 integration issue or a database issue? 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. LAWSON: Pres, sir. 24 MS. LAWSON: Yes, sir. 25 MS. LAWSON: Yes, sir. 26 MS. LAWSON: Yes, sir. 27 MS. LAWSON: William that the world and the provided an the provided and that the database issue? 28 MS. LAWSON: Ves, sir. 29 MS.		
8 delivery address. 9 MS. LAWSON: This is Beth Lawson. 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases— 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a— 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan — the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 through, but this should not be an issue that 10 causes any type of problems. 11 MS. McMILLON: Okay. 12 MS. NELSON: Are you saying that 13 your retail is affected similarly? 14 MS. LAWSON: If there is — when 15 they go in to do a change order and it matches 16 against something, I mean, we have to update the 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. NELSON: Is this an 20 integration issue or a database sisue? 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MS. SRINVASA: A database 25 accuracy issue. Page 94 1 estimate of 5 percent. 2 MS. LAWSON: Yes, sir. 3 AT&T. 4 MS. LAWSON: Yes, sir. 4 MS. LAWSON: Is there any 5 so it's a — I think Beth would agree with 6 that — so that, obviously, if the address 7 validation process checked against a consistent 8 record and a record that was the one being 9 edited against downstream, you wouldn't have a 10 mismatch occur. So I just wanted to make sure 11 we accurately defined what the issue was. 12 MR. SRINVASA: Starting from the 13 month of May, my udestranding is that you will	t know about the directory 7 There could be a timing in that the	
9 through, but this should not be an issue that 10 The directory delivery or the listed? 11 MS. McMILLON: Listing. 12 MS. LAWSON: Listed address. 13 MS. COX: Should have the same 14 values. 15 MS. McMILLON: And we had briefly 16 discussed mismatches in the address databases— 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an 26 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a— 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan — the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 10 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important — and 12 the CLECs tried to make this also an issue in 14 panacea to fix everything. 9 through, but this should not be an issue that 10 causes any type of problems. 11 MS. McMILLON: Okay. 12 MS. NELSON: Are you saying that 13 your retail is affected similarly? 14 MS. LAWSON: If there is — when 15 they go in to do a chard to make the is also an issue on the address and the matches some type of change that didn't get updated. 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. NELSON: It doesn't have 21 misteration issue or a database issue? 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINIVASA: A database 25 accuracy issue. Page 94 1 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINIVASA: A database 25 accuracy issue. Page 94 1 MS. LAWSON: It doesn't have a — 26 MS. LAWSON: Yes, sir. 27 MS. LAWSON: Yes, sir. 28 MS. LAWSON: Yes, sir. 29 MS. LAWSON: Yes, sir. 20 MS. LAWSON: Yes	1	
The directory delivery or the listed? MS. McMILLON: Listing. MS. McMILLON: Listing. MS. McMILLON: Listing. MS. McMILLON: Clary. MS. McMILLON: And we had briefly discussed mismatches in the address databases more with the databases that might contain address minormation. And did you provide a percentage more minimal. MS. LAWSON: This is Beth Lawson more with Southwestern Bell. MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. MS. McMILLON: Okay. So Southwestern Bell doesn't have a MS. McMILLON: Okay. So Southwestern Bell doesn't have a MS. LAWSON: No. Page 94 1 estimate of 5 percent. MS. LAWSON: No. MS. McMILLON: Okay. So Southwestern Bell doesn't have a MS. LAWSON: No. MS. McMILLON: Okay. So MS. McMILLON: Okay. So MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. LAWSON: Yes, sir. MS. 16 discussed mismatches in the address databases 17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an 26 estimate of 5 percent. 27 MS. McMILLON: Okay. So 28 Southwestern Bell doesn't have a 29 MS. McMILLON: Okay. Is there any 29 page 94 20 page 94 21 MS. LAWSON: It doesn't have any 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINTVASA: A database 25 accuracy issue. 26 Page 94 27 Page 94 28 Page 94 29 MS. LAWSON: Yes, sir. 29 MS. McMILLON: Okay. So 30 Southwestern Bell doesn't have a 40 MS. LAWSON: No. 51 MS. McMILLON: Okay. Is there any 52 page 94 53 page 94 64 pan the concern is still that we are going 74 to have address mismatches because they will 85 still be pulling the information from CRIS, and 96 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECS tried to make this also an issue in 13 change management that this is not the 14 panacea to fix everything.	MILLON: And we had briefly 15 they go in to do a change order and it match	;
17 well, the databases that might contain address 18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 25 MS. NELSON: AT&T provided an 26 estimate of 5 percent. 27 MS. NELSON: AT&T provided an 28 page 94 29 lestimate of 5 percent. 29 MS. McMILLON: Okay. So 30 Southwestern Bell doesn't have a 4 MS. LAWSON: AT&T provided an 4 It's an address validation issue, and 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECs tried to make this also an issue in 13 change management that this is not the 14 panacea to fix everything. 17 CRIS record to match PREMIS if there has been 18 some type of change that didn't get updated. 19 MS. NELSON: Is this an 20 integration issue or a database issue? 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINIVASA: A database 25 accuracy issue. Page 94 Pa 1 MS. LAWSON: Yes, sir. 2 MS. LAVALLE: Kathleen LaValle for 3 AT&T. 4 It's an address validation issue, and 5 so it's a I think Beth would agree with 6 that so that, obviously, if the address 7 validation process checked against a consistent 8 record and a record that was the one being 9 edited against downstream, you wouldn't have a 10 mismatch occur. So I just wanted to make sure 11 we accurately defined what the issue was. 12 MR. SRINIVASA: Starting from the 13 month of May, my understanding is that you will 14 no longer reject because of the address		
18 information. And did you provide a percentage 19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. LAWSON: No. 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. So 6 Southwestern Bell doesn't have a regoing 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 the CLECs tried to make this also an issue in 14 panacea to fix everything. 18 some type of change that didn't get updated. 19 MS. NELSON: Is this an 20 integration issue or a database issue? 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINIVASA: A database 25 accuracy issue. 25 accuracy issue. 26 Page 94 27 MS. LAWSON: Yes, sir. 28 MS. LAWSON: Yes, sir. 29 MS. LAWSON: Yes, sir. 20 MS. LAWSON: Yes, sir. 21 MS. LAWSON: Ves, sir. 22 MS. LAWSON: Yes, sir. 23 MS. LAWSON: Yes, sir. 24 MR. SRINIVASA: A database 25 accuracy issue. 26 And I guess it's information issue, and securately defined what was the one being of that so that, obviously, if the address 27 validation process checked against a consistent on mismatch occur. So I just wanted to make sure in we accurately defined what the issue was. 28 MR. SRINIVASA: Starting from the information of May, my understanding is that you will no longer reject because of the address	· · · · · · · · · · · · · · · · · · ·	
19 of mismatched, an estimation of that? I missed 20 that. 21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't be fixed by 11 this release. And I guess it's important and 12 change management that this is not the 13 change management that this is not the 14 panacea to fix everything. 19 MS. NELSON: Is this an 20 integration issue or a database issue? 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 24 MR. SRINIVASA: A database 25 accuracy issue. 25 accuracy issue. 26 MS. LAWSON: Yes, sir. 27 MS. LAWSON: Yes, sir. 28 MS. LAWSON: Yes, sir. 29 MS. LAWSON: Yes, sir. 20 MS. LAWSON: Yes, sir. 30 AT&T. 4 It's an address validation issue, and 4 that so that, obviously, if the address 5 validation process checked against a consistent 8 record and a record that was the one being 9 edited against downstream, you wouldn't have a 10 mismatch occur. So I just wanted to make sure 11 we accurately defined what the issue was. 12 MR. SRINIVASA: Starting from the 13 change management that this is not the 14 panacea to fix everything.		
21 MS. LAWSON: This is Beth Lawson 22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an 26 Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS. So we're still going to 10 have address mismatches that won't'be fixed by 11 this release. And I guess it's important and 12 the CLECs tried to make this also an issue in 13 change management that this is not the 14 panacea to fix everything. 21 MS. LAWSON: It doesn't have 22 anything to do with integration at all. 23 MS. NELSON: Okay. 4 MR. SRINIVASA: A database 25 accuracy issue. Page 94 1 MS. LAWSON: Yes, sir. 2 MS. LAVALLE: Kathleen LaValle for 3 AT&T. 4 It's an address validation issue, and 5 so it's a I think Beth would agree with 6 that so that, obviously, if the address 7 validation process checked against a consistent 8 record and a record that was the one being 9 edited against downstream, you wouldn't have a 10 mismatch occur. So I just wanted to make sure 11 we accurately defined what the issue was. 12 MR. SRINIVASA: Starting from the 13 change management that this is not the 14 panacea to fix everything.	an estimation of that? I missed 19 MS. NELSON: Is this an	
22 with Southwestern Bell. 23 No, I did not. My understanding, that 24 it's very minimal. 25 MS. NELSON: AT&T provided an 26 Page 94 1 estimate of 5 percent. 2 MS. McMILLON: Okay. So 3 Southwestern Bell doesn't have a 4 MS. LAWSON: No. 5 MS. McMILLON: Okay. Is there any 6 plan the concern is still that we are going 7 to have address mismatches because they will 8 still be pulling the information from CRIS, and 9 downstream uses PREMIS.
